

# UNIVERSITY OF WASHINGTON

OFFICE OF THE PRESIDENT

*Mark A. Emmert, President*

June 3, 2009

TO: Board of Regents  
Phyllis Wise, Provost  
B. Bruce Bare, Dean, College of Forest Resources  
Gordon Bradley, Faculty Chair, College of Forest Resources  
Dennis L. Hartmann, Interim Dean, College of the Environment  
David Lovell, Chair, Faculty Senate

FROM: Mark A. Emmert  
President

RE: Final decision regarding the proposed transition of the College of Forest Resources into a School of Forest Resources within the College of the Environment

At its February 9, 2009, meeting, the Senate Committee on Planning and Budgeting concurred with Provost Wise's recommendation to initiate a review for consolidation of the College of Forest Resources into the College of the Environment. As prescribed in the Faculty Code (Section 26-41: Reorganization, Consolidation & Elimination of Programs), the Secretary of the Faculty then published the detailed proposal for this reorganization in a Class C bulletin on April 2, 2009, and the Chair of the Faculty Senate appointed a Review Committee to conduct an open review of the Provost's proposal. The Review Committee delivered its written recommendations to me on May 4, 2009.

After review of the Provost's proposal and the Review Committee's recommendations, and having conferred with the Senate Committee on Planning and Budgeting on May 18, 2009, I have decided to move forward on the Provost's proposal to transition the College of Forest Resources into a School of Forest Resources within the College of the Environment.

The College of Forest Resources will be joining four other academic units that have already undergone the review process outlined in the Faculty Code to join the College of the Environment on July 1, 2009. These units include the Department of Atmospheric Sciences, the Department of Earth and Space Sciences, the School of Marine Affairs, and the Program on

the Environment. In addition, the Joint Institute for the Study of the Atmosphere and Ocean (JISAO) has already been transferred from the Office of Research into the College of the Environment. This is a solid foundation from which the University of Washington will endeavor to build the strongest and most capable environmental research and teaching institution in the world.

For more than 100 years, the University of Washington's College of Forest Resources has been our state's premier educational program for training and educating professionals to manage critical natural resources for industry, public agencies, non-profit organizations, and private landowners. It also has been a vibrant research enterprise, providing answers and leadership on a multitude of environmental and natural resource issues of regional and global importance. With this strong tradition of excellence and a mission dedicated to generating and disseminating knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services through teaching, research, and outreach, I expect the School of Forest Resources to flourish in its new role as a cornerstone of the UW's new College of the Environment.
