His research focuses on comparative and cost-effectiveness analyses, causal inference methods, program evaluation, and outcomes research. He is regarded as a leading international expert on methods to study heterogeneity in clinical and economic outcomes to establish the realized and potential values of medical technologies and public health interventions and individualized care. Dr. Basu is an Associate Editor for Health Economics, and Observational Studies and formerly of the Journal of Health Economics. He has taught courses in health economics, decision analysis, cost-effectiveness analysis and health services research methods. He served on the Second Panel on Cost-effectiveness Analysis in Health and Medicine. Currently, Dr. Basu is the Stergachis Family Endowed Professor and Director of the Pharmaceutical Outcomes Research and Policy Program at the University of Washington Seattle. He holds joint appointments with the Departments of Health Services and Economics at UW, is a Faculty Research Fellow at the National Bureau of Economic Research, and an elected Fellow of the American Statistical Association.
