

Eco-art: Art in Response to the Ecological Crisis

Ostara Goddess – artist unknown

Eco-art: Art in Response to the Ecological Crisis

Taught by Beverly Naidus

Students develop proposals for projects about the four elements (earth, air, fire and water). Their projects celebrate their relationship to nature or comment on the ecological crisis and eco-restoration. They develop one proposal into a final project and create a collaborative project for the community.

Walking meditation on the first day of class after discussing what a “superfund” site is and what it means to live with ASARCO smelter damaged soil in Tacoma - 2008
