Developing Web Applications
Spring 2000

Assignment Information

The following is a tentative list of assignments and their due dates. Details of each assignment will be distributed in class. Unless arranged in advance, assignments are due at the beginning of class on the designated date.

Assignment	Topic	Due Date
1	Accessing and processing a database using the DAO data control and bound controls.	April 6
2	Creating and manipulating a collection of account objects.	April 13
3	Accessing and processing a database using ADO objects.	April 20
4	Creating an ActiveX component.	April 27
5	Building a client-side browser component using VBScript.	May 4
6	Building a client/server application using ASP and RDS components.	May 18
7	Building a browser-based application using IE5 that processes and displays XML data.	May 30

The first five assignments are to be done individually. The last two assignments will be done in small teams of 3-4 people each.
