

Neuron Dominoes

Visceral Neuron	Nucleus	Ganglion	Tracts	Nerves
A collection of cell bodies in the central nervous system.	A collection of cell bodies in the peripheral nervous system.	Collections of axons in the central nervous system.	Collections of axons in the peripheral nervous system.	A neuron that carries information INTO the central nervous system.
Sensory Neuron	Motor Neuron	Cranial Nerve	Spinal Nerve	Somatic Neuron
A neuron that carries information away from the central nervous system.	A nerve that connects the brain with the periphery.	A nerve that connects the spinal cord with the periphery.	A neuron that connects the skin or muscle with the central nervous system.	A neuron that connects the internal organs with the central nervous system.

Directions: Cut out each of the ten dominoes. Mix up the dominoes and then match each word with its correct description on another domino. Match the black dots of each domino. If you have matched the words and their descriptions correctly, you will have made a rectangle with all of the dominoes.
