

# Independent project drafts

- Drafts graded gently
  - Full credit if submitted on time, directions followed
- Peer reviews also graded gently
  - Grades aside, many were fantastic!

# General notes

- Figure/table
  - No penalty for not having this in draft, but ...
  - Final version should have an original figure/table
    - Methods schematic?
    - Simplification of data presented?
    - Cartoon model?

	Drug type	Kills gametocytes?	Blocks transmission?	
			Mosquito-to-human	Human-to-mosquito
<u>Lopinavir</u>	Protease inhibitor	Yes	Yes	Yes
<u>Saquinavir</u>	Protease inhibitor	Yes	Yes	Yes
Ritonavir	Protease inhibitor	No	Not tested	Not tested
TMP-SMX	Antibiotic	No	Yes	No
<u>Nevirapine</u>	Nonnucleoside reverse-transcriptase inhibitor	No	No	No

# General notes

- Tell a journalistic “story”
  - Take-home message right up front
  - Go light on the methodological details – what is the essence of the approach?
  - Consider integrating methods with results
  - Title and subheadings should help tell the story

# General notes

- Specific questions for me are welcome (email, phone, office hours...)
