

Table 1: Critical values for the Studentized range.

Tabulated are the upper 0.05 and 0.01 critical values for the Studentized range. The first column gives the degrees of freedom for the estimate of the variance used in the denominator. The corresponding table entries give the critical values for 2 to 10 groups, or means, in the numerator.

df	Upper 0.05 critical values									
	<i>k = sample size for the range = number of groups</i>
