### Visibility

## Major Reservoirs and Burdens of Sulfur (TgS)

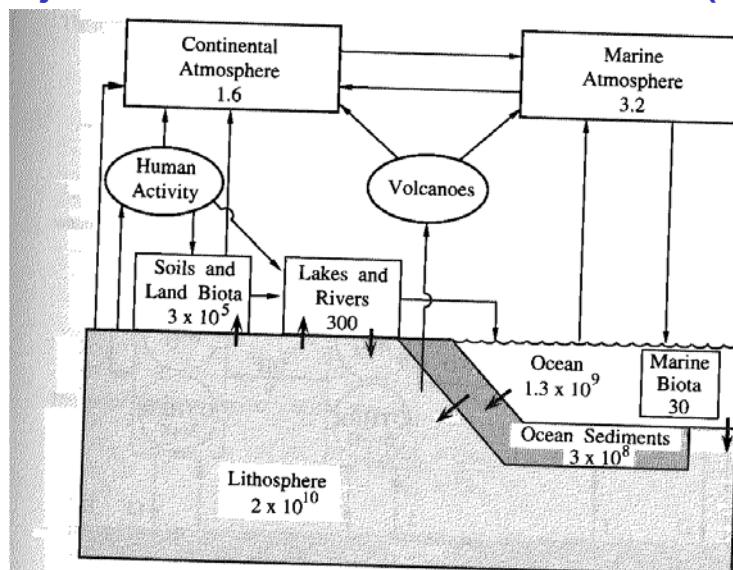

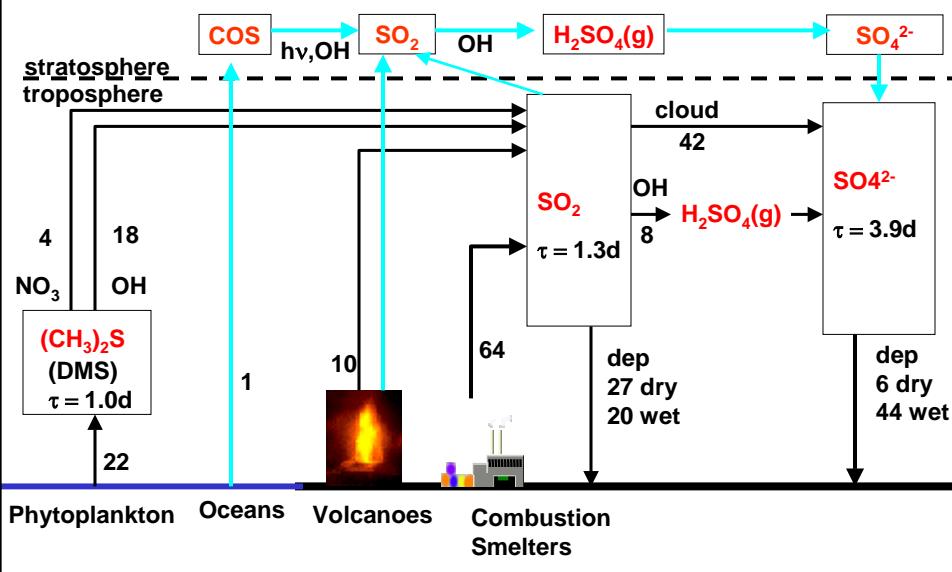

FIGURE 2.2 Major reservoirs and burdens of sulfur, in Tg(S) (Charlson et al., 1992). Reprinted by permission of Academic Press.

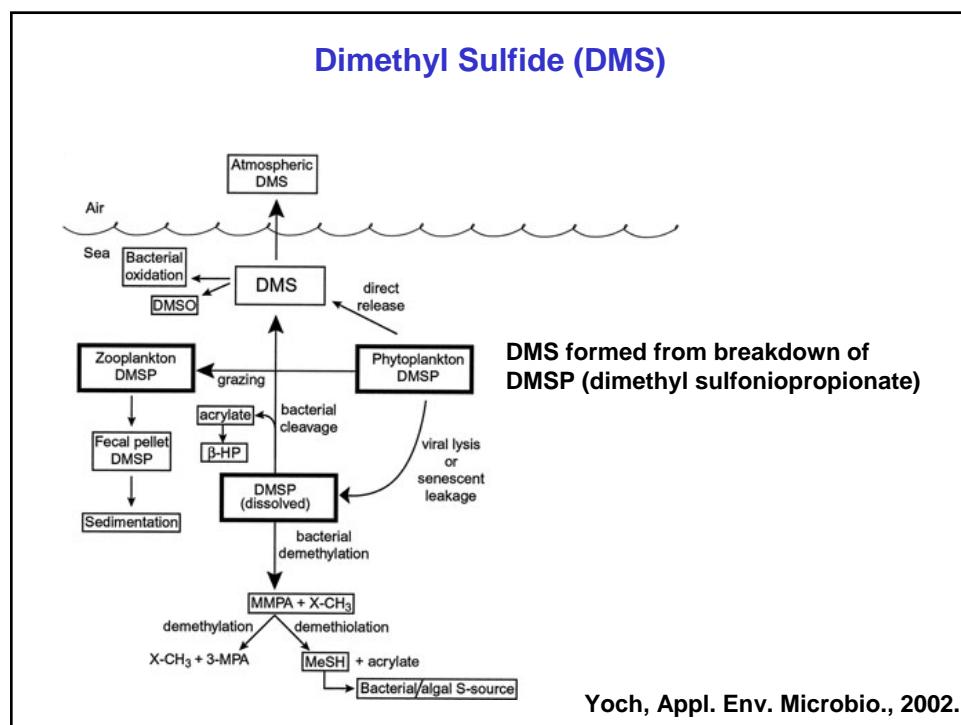

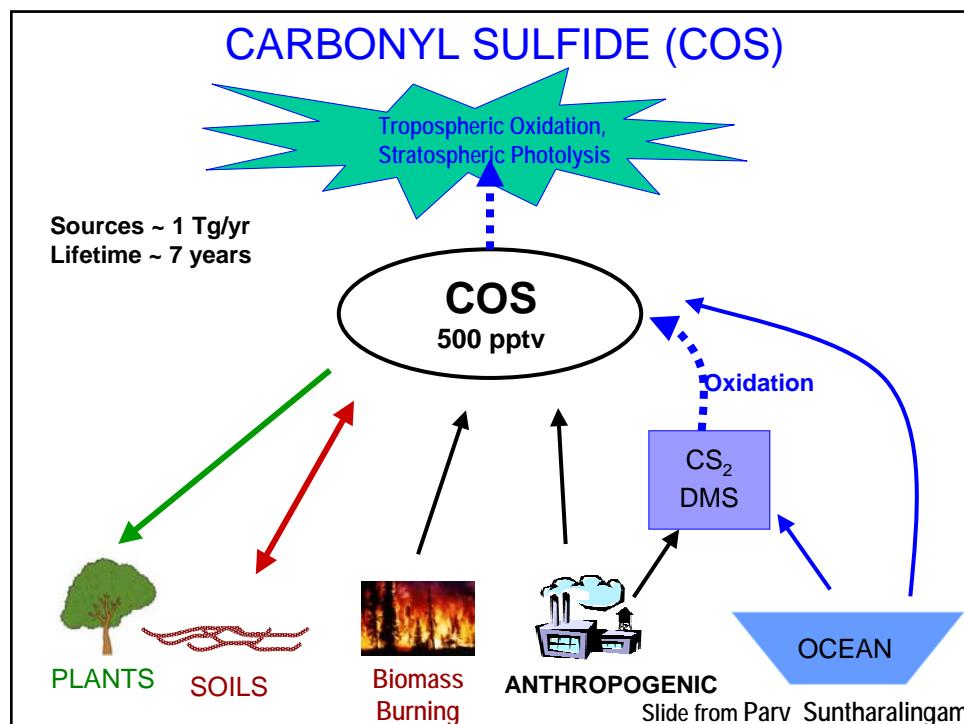

## Global Sulfur Emission Estimates (TgS /yr)

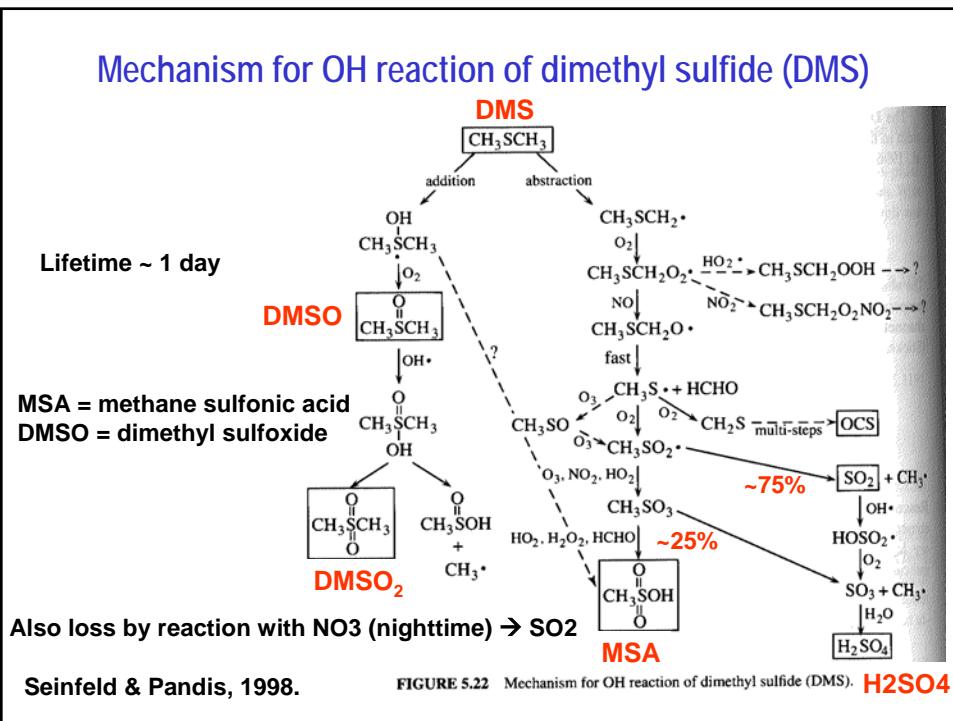

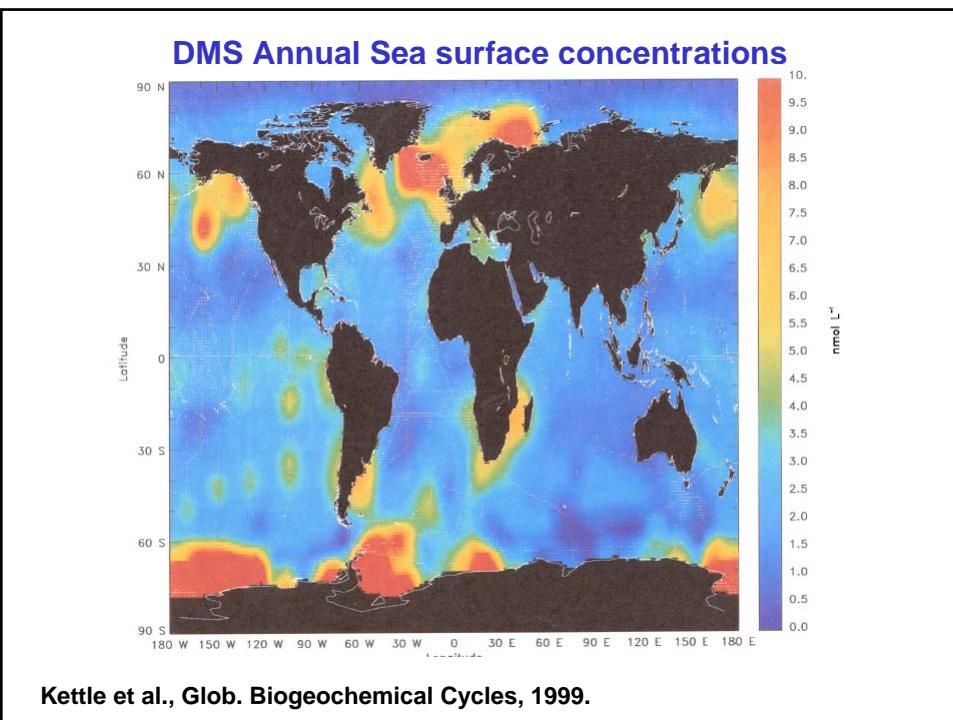

Sources	Compound	Emissions
Oceans (without sea-salt)	DMS ( $\text{CS}_2$ , OCS)	15-25
Volcanoes	$\text{SO}_2$ , $\text{SO}_4^{2-}$ ( $\text{H}_2\text{S}$ , OCS)	9-12
Plants + Soils	$\text{SO}_4^{2-}$ , $\text{H}_2\text{S}$ (DMS, $\text{CS}_2$ )	0.2-1
Fossil Fuel Combustion (+industry)	$\text{SO}_2$ ( $\text{SO}_4^{2-}$ , $\text{H}_2\text{S}$ , $\text{CS}_2$ )	70-80
Biomass Burning	$\text{SO}_2$ ( $\text{SO}_4^{2-}$ , OCS)	2-3
	Total	98-120
Sinks		
Dry Deposition	$\text{SO}_2$ , $\text{SO}_4^{2-}$	50-60
Wet Deposition	$\text{SO}_2$ , $\text{SO}_4^{2-}$	50-60

Seinfeld & Pandis, 1998.

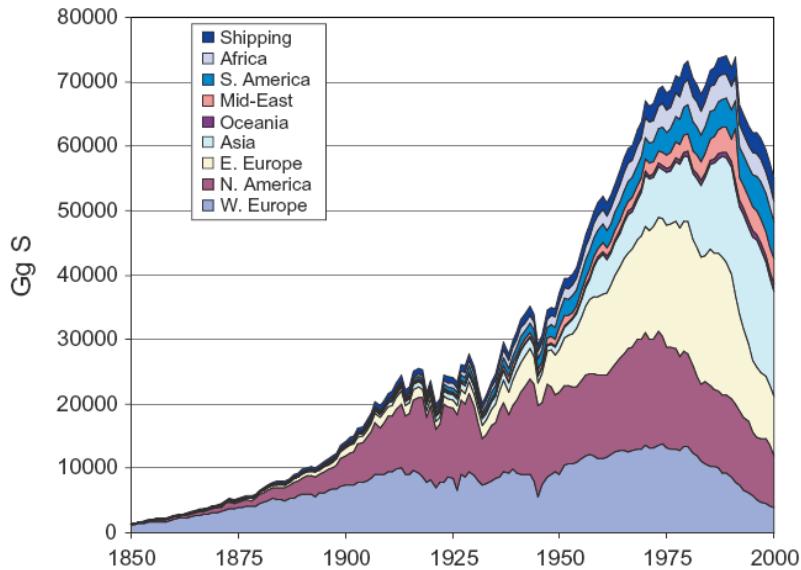

## GLOBAL SULFUR BUDGET (flux terms in Tg S yr<sup>-1</sup>)

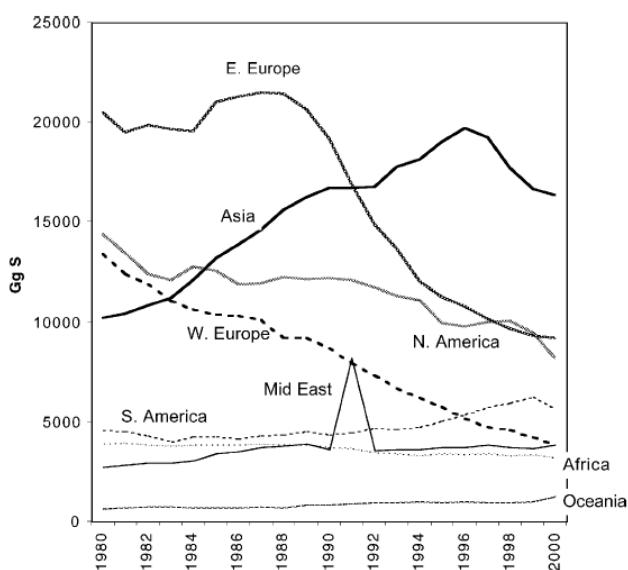

### Trends in Anthropogenic Sulfur emissions (1850-2000)

Stern, Chemosphere 58 (2005)

### Recent Trends in Sulfur Emissions (1980-2000)

Stern, Chemosphere 58 (2005)
