I. TAXICOL, BEING PART OF THE SOLUTION

TAXICOL, THE FUTURE OF URBAN MOBILITY:

TAXICOL is a fresh new concept of intelligent urban and suburban public transport, consisting in autonomous modules.

TAXICOL, AMAZINGLY VERSATILE:

On demand, these modules can be linked together by virtual chaining in order to form a convoy of up to 5 modules (i.e. 110 passengers).

TAXICOL enables two distinct driving modes: "automatic mode" (without driver) for use on specific pathway and "manual mode" dedicated to open urban environment.

TAXICOL, 100% ECO FRIENDLY:

The electric powered modules are equipped with a range extender running on bio-ethanol increasing their autonomy.

Door opening, lighting, heating, air conditioning and multimedia are provided by solar panells.

TAXICOL, THE FIRST TRULY NEW MOBILITY SYSTEM FOR THE 21 ST CENTURY:

TAXICOL's onboard electronics systems allow a continuous exchange with the user in order to provide real time information about traffic.

TAXICOL, THE « MINI-TRAM » FOR MEDIUM SIZED CITIES

Unlike other means of public transports, TAXICOL does not require expensive infrastructures.

TAXICOL's automatic drive control is provided by optical guidance following a rail painted on the road and is secured by GPS and radio contact.

TAXICOL is therefore capable of temporarily leaving its "electronic path" to avoid obstacles without disrupting the network.

TAXICOL, AWARDED BY THE CONSEIL GÉNÉRAL DES YVELINES:

TAXICOL has been awarded a prize by Yvelines County in France (County near Paris which includes the city of Versailles) as part of the "Intelligent Vehicles - City of the Future" contest.

TAXICOL's prototype has been introduced as a world premiere at the 2013 Geneva Motor Show.

TECHNICAL SPECIFICATIONS

Dimensions (LxWxH):	550 cm x 200 cm x 246 cm	Mass :	4300 kg full loaded	Commercial Range :	160 km
Power :	90 kW	Performances :	90 km/h	Passengers :	22 per module

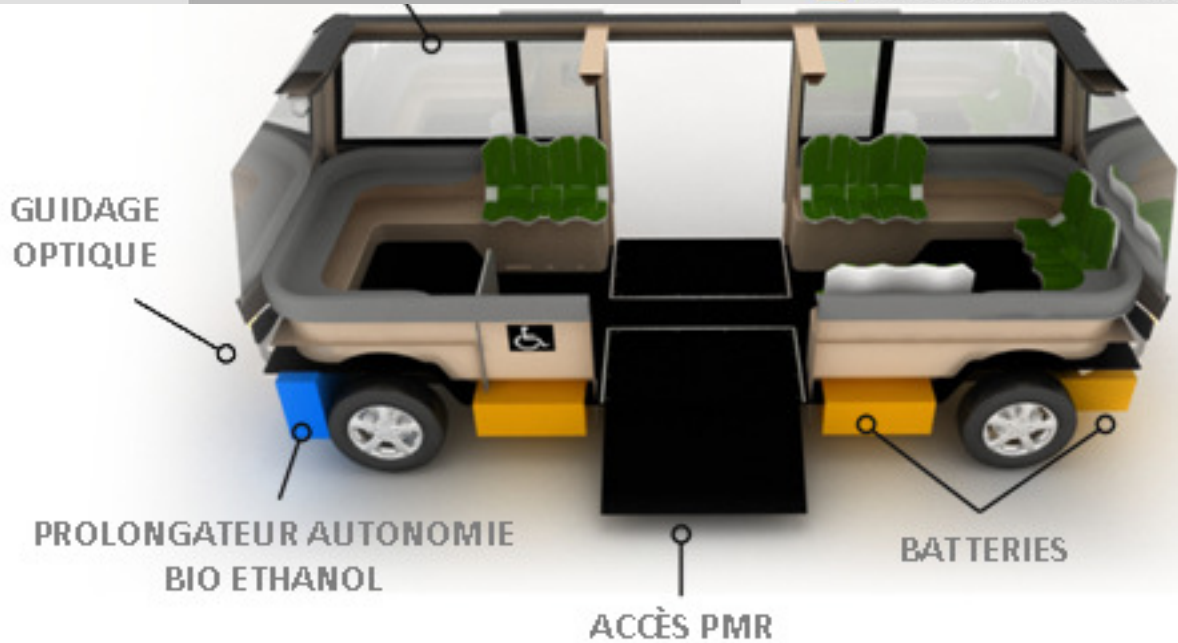

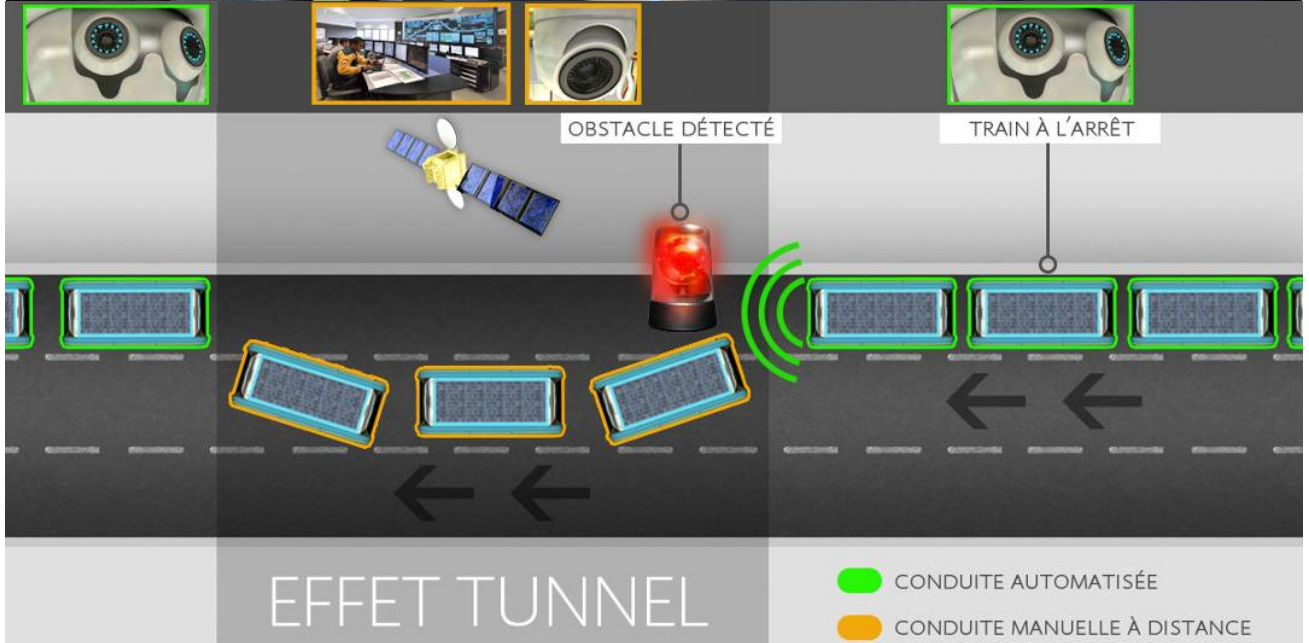

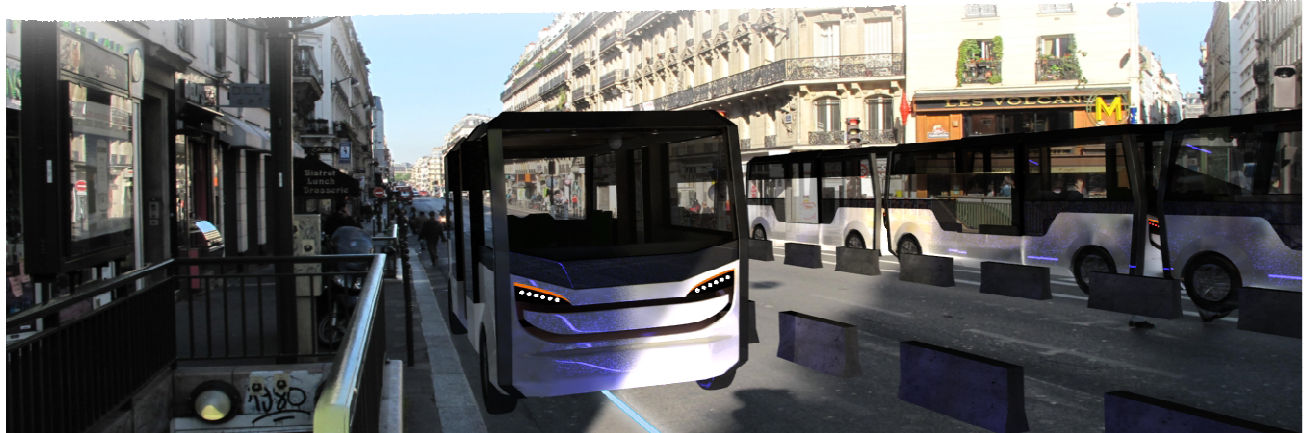

OUR ASSETS TO SUCCEED

Created in 2002, EXID Assistance Aux Projets is a company specialized in Project Management. The company propose three main activities: change management; Project Control (organization, scheduling, cost control, risk management...); Supply-Chain management..

EXID Assistance Aux Projets counts among his customers the RATP (PARIS PUBLIC TRANSPORT SYSTEM), VALEO, GDF-SUEZ and also developed MICRON, a "turnkey" project of electric urban vehicle which was presented in world premiere at the 2011 Geneva Motor Show.

To succeed in this project, EXID Assistance Aux Projets, joined forces with technical partners known and recognized for their expertise, know-how and excellence in car engineering and design.

3. INTRODUCING EXID ASSISTANCE AUX PROJETS

EXID

Assistance aux Projets

CONSULTING AND ASSISTANCE
IN CHANGE MANAGEMENT,
PROJECT MANAGEMENT
AND MANUFACTURING
PROCESS MANAGEMENT.

OUR CORE BUSINESS IS TO HELP OUR CLIENTS IN SUCCEEDING IN THEIR PROJECTS!

Created in 2002, **EXID Assistance Aux Projets** is specialized in Change Management, Project Management (scheduling, cost-control, quality management, etc) and manufacturing process management (purchase, supply-chain, etc); **EXID Assistance Aux Projets** also provide their clients with a wide range of solutions tailored to the specific needs and financial, technical and time constraints inherent to their projects.

Project Management :

- OBS/WBS of the projects;
- Time Management;
- Cost and resources controlling;
- Quality management;
- Risk management;
- Configuration management;
- Coordination;

Change Management :

- Coaching;
- Organizations Engineering;
- Management systems implementation: ITIL, CMMI, ISO...
- Process optimization;
- Training and assistance;
- Knowledge / experience capitalization;

Manufacturing process management:

- Purchasing;
- Supply Chain management;
- Management of Suppliers' Quality

Our company and team's skills and experience demonstrate extensive expertise in consulting and assistance on projects of all kinds and in all areas of activity:

Telecoms – IT - Car industry – Railways engineering - R&D - Medical - Banking – Aeronautic and space technology - Industry - Defence – Buildings and infrastructures - Industry - Environment - Oil – Energy

EXID, OUR SPIRIT AND OUR TEAM

Our uniqueness is based on five fundamental points :

- **Listening to our customers**, understanding their problematic and respecting their requirements;
- **Reliability of our consultants** with regards to their technical and professional skills, their strive and commitment to the achievement and success of their mission;
- **Rigorous** methods flexible enough to cater to the actual needs;
- Managerial tutoring through **operational business solutions truly adapted to each situation**;
- **One of the best / satisfaction Investment ratios on the market**

Moreover, **EXID Assistance Aux Projets'** structure is deliberately human sized, which allows them to adapt quickly to the needs and concerns of their customers and is committed to them with versatility and attention to results.
