

# EMPIRICAL PROCESSES WITH APPLICATIONS TO STATISTICS

Galen R. Shorack and Jon A. Wellner

## Table of Contents

1. Introduction and Survey of Results .....	1
2. Foundations, Special Spaces and Special Processes .....	23
3. Convergence and Distributions of Empirical Processes .....	85
4. Alternatives and Processes of Residuals .....	151
5. Integrals Tests of Fit and Estimated Empirical Processes .....	201
6. Martingale Methods .....	258
7. Censored data; the Product-Limit Estimator .....	293
8. Poisson and Exponential Representations .....	334
9. Some Exact Distributions .....	343
10. Linear and Nearly Linear Bounds on the Empirical Distribution.....	404
11. Exponential Inequalities and $\ \cdot/q\ $ -Metric Convergence of $U_n$ and $V_n$ .....	438
12. The Hungarian Constructions of $K_n$ , $U_n$ , and $V_n$ .....	491
13. Laws of the Iterated Logarithm Associated with $U_n$ and $V_n$ .....	504
14. Oscillations of the Empirical Process .....	531
15. The Uniform Empirical Difference Process $D_n = U_n + V_n$ .....	584
16. The normalized Uniform Empirical Process $Z_n$ and the Normalized Uniform Quantile Process .....	597
17. The Uniform Empirical Process Indexed by Intervals and Functions .....	621
18. The Standardized Quantile Process $Q_n$ .....	637
19. $L$ -statistics .....	660

20. Rank statistics.....	695
21. Spacings.....	720
22. Symmetry.....	743
23. Further Applications.....	763
24. Large Deviations.....	781
25. Independent but not Identically Distributed Random Variables.....	796
26. Empirical Measures and Processes for General Spaces.....	826
<b>A.</b> Appendix A: Inequalities and Miscellaneous.....	842
<b>B.</b> Appendix B: Counting Process Martingales.....	884
<b>References</b> .....	901
<b>Author Index</b> .....	923
<b>Subject Index</b> .....	927
