Education

B. S. in Psychology, 1976, University of Washington, Seattle WA

Ph. D. in Psychology, 1984, University of Michigan, Ann Arbor, MI

Professional History

1973 - 1979	Research Technician, University of Washington
1979 - 1984	Graduate Training, University of Michigan
1984 - 1988	Assistant Professor, University of Washington
1988 - 1989	Visiting Assistant Professor, Stanford University
1989 - 1992	Assistant Professor, University of Washington
1992 - 2005	Research Consultant, University of Washington
2005 - present	Research Professor, University of Washington

Research and Teaching Interests

Cognitive Psychology, especially Attention
Visual Perception, Visual Psychophysics and Visual Neuroscience

My research focuses on visual attention. Much of the work involves the quantitative measurement of selective and divided attention phenomena using the methods of visual psychophysics. These measurements are used to test alternative quantitative theories. I also have an ongoing collaborations with Dr. Cathleen Moore on visual attention and with Dr. Geoff Boynton on the neural basis of attention.

Books

Teller, D. Y. and Palmer, J. (expected 2018). Vision and the Visual System, Oxford: Oxford University Press.

Dr. Teller completed 90% of this book before she passed away. I am finishing it and the next-to-final version can be found at my web site:
<http://faculty.washington.edu/jpalmer/files/Teller/>

- White, A. L., Palmer, J. & Boynton, G. M. (2016). Can you recognize two words at once? Characterizing capacity limits in the visual processing of words. Talk presented at the meeting of the Visual Sciences Society, St. Pete Beach, FL.

Principal-Investigator Research Grants

- Sigma Xi Grants-in-aid of Research Award, Testing alternative theories of visual localization, \$400, 1983.
- Rackham Dissertation/Thesis Grant from the University of Michigan, Testing alternative theories of visual localization, \$1500, 1983-1984.
- Grant from the Graduate School Research Fund of the University of Washington, Memory for visual attributes, \$10,300, 1985-1986.

National Eye Institute Equipment Grant with Drs. Teller and Buck, Instrumentation, \$63,000, 1985-1986.

Digital Equipment Corporation ISIS Grant, Graphics lab for human psychophysics, 50% discount on \$50,000 of equipment, 1986-1988.

Grant from the Graduate School Research Fund of the University of Washington, Memory for visual information II, \$6,300, 1986-1987.

Equipment Grant from the Graduate School Research Fund of the University of Washington, High-resolution graphics scope, \$3,400, 1986-1987.

Grant from the Graduate School Research Fund of the University of Washington with Corlene Ankrum, Perception and memory for objects and parts, \$4,500, 1990-1991.

Research Grant from the General Dynamics Corporation, Applied vision models, \$3,000, 1991.

Grant from the Royalty Research Fund of the University of Washington, Distinguishing parallel and serial processing in divided attention, \$40,000, 2009-2011.

Co-Investigator Research Grants, Contracts, Training Grants

Olympus Project Grant from the University of Washington with Dr. Hunt, PI, and Dr. Loftus, A computerized laboratory for teaching human experimental psychology, \$13,000 & \$24,000 of equipment, 1986-1988.

National Eye Institute Training Grant with Dr. Hendrickson, PI, and 23 others, Basic and clinical training in vision research, \$207,000, 1987-1991.

Research Contract, Battelle, Seattle WA, Measurements of automobile headlamp masking of turn signals. \$13,500, 1993-1994.

Research Contract, OptiMetrics, Ann Arbor MI, Evaluating a human search model for military target acquisition, \$10,000, 1993-94.

Grant from the Royalty Research Fund of the University of Washington to Dr. Geoff Loftus (PI), Integrating theories of time and intensity, \$24,000, 1996.

National Eye Institute Grant to Dr. Davida Teller (PI), Infant spectral sensitivity, ~\$600,000, 1995-1999.

National Eye Institute Grant to Dr. Davida Teller (PI), Infant color vision, ~\$1,100,000, 2000-2004.

National Eye Institute Grant to Dr. Michael Shadlen (PI), Neural mechanisms of visual perception, ~\$800,000, 2001-2006.

National Eye Institute Grant to Dr. Michael Shadlen (PI), Neural mechanisms of visual perception, ~\$1,200,000, 2006-2011.

National Institute of Mental Health Grant to Dr. Cathleen Moore (PI), Attention and Oculomotor Control: Attentional Resolution, ~\$1,000,000, 2003-2009.

National Eye Institute Grant to Dr. Geoff Boynton (PI), The effects of attention in human visual cortex, \$1,890,000, 2014-2019.

Honors

National Science Foundation Graduate Fellowship, 1979-1982

National Eye Institute Training Grant, 1982-1984

Invited to Attention and Performance XIV, 1990

David Teller Distinguished Faculty Award, 2008

Fellow in the American Psychological Society, 2008

Professional Organizations

Psychonomic Society

American Psychological Society

Association for Research in Vision and Ophthalmology

Society for Mathematical Psychology

Optical Society of America

Doctoral and Masters Students (Chaired their committee)

Aura Hanna, MS in Psychology, UW, 1985. Are there selective interference effects on recall of words encoded using imaginal or verbal strategies. Completed her PhD with Dr. Geoffrey Loftus; became an assistant professor at Virginia Commonwealth University.

Corlene Ankrum, Psychology, PhD in Psychology, UW, 1992. The effect of cueing on object and part comparisons. Became an assistant professor at Washington State University, Vancouver.

Dawn Aiken, MS in Psychology, UW, 1992. Comparing conjunction and disjunction visual search with equally similar targets.

Charles Traynor, PhD in Psychology, UW, 1995. The illusory contrast reversal: Evidence for spatially-local adaptation in the visual system.

Iris Zemach, PhD in Psychology, UW, 2007. The influence of prior stimuli on lightness judgments.

Alec Scharff, PhD in Psychology, UW, 2011. Visual object perception under divided attention.

Serap Yiğit-Elliott, PhD in Psychology, 2012. Three paradigms for selective attention in vision.

Other Graduate Students (helped supervise)

Jonathan Schooler, PhD in Psychology, UW, 1986. Verbalizing non-verbal memories: Some things are better left unsaid.

AmyJo Bilson, PhD in Psychology, UW, 1987. Image size and resolution in face recognition.

David Wheeler, PhD in Psychology, UW, 1989. Sensitivity of the peripheral vision to simulated aircraft ascent and descent.

Sheri McFall, MS in Occupational Health, UW, 1991. Test-retest reliability of the test of visual perceptual skills with first grade children.

Virginia Curulla, PhD in Education, UW, 1991. Aggression replacement training in the community for adult learning disabled offenders.

Kathy Arehart, PhD in Speech and Hearing Sciences, UW, 1992. Effects of harmonic content on complex-tone frequency discrimination in hearing-impaired listeners.

- Roger Knight, PhD in Psychology, UW, 1992. Rod temporal mechanisms and cone pathways.
- Jill Bargones, PhD in Speech and Hearing Sciences, UW, 1992. Selective attention to sound frequency by infants and adults.
- Jennifer McLean, PhD in Psychology, UW, 1999. Processing capacity of visual perception and memory encoding.
- Sarina Hui-Lin Chien, PhD in Psychology, UW, 2003. Lightness Constancy in 4-month-old Infants: A Cue Elimination Approach.
- Maria Pereverzeva, PhD in Psychology, UW, 2006. Simultaneous color contrast in 4-month-old infants is revealed by a temporal modulation paradigm.
- Heather Knapp Paterson, PhD in Psychology, UW, 2006. Attentional capacity limitations on the identification of alphanumeric characters, English words, and American Sign Language signs.
- Nan-Ching Tai, PhD in Architecture, UW, 2009. Role of Light in Real and Pictorial Spaces: A Computational Framework to Investigate Scene-Based Luminance Distributions and Their Impact on Depth Perception.
- Barry Wark, PhD in Neurobiology and Behavior, UW, 2009. Optimal Adaptation Strategies in Sensory Neural Processing.
- Michael Perry, PhD in Psychology, UW, 2009. Testing Two Computational Models of Preference: The Person Trade-Off and Cumulative Prospect Theory.
- Laura Thomas, PhD in Psychology, UW, 2010. Exploring the Generality of Rod Hue Biases.
- Zach Ernst, PhD in Psychology, UW, 2010. Object-based attention: The effects of selective and divided attention.
- Kristie Fisher, PhD in Psychology, UW, 2011. Analogical Integration of Semantic and Arithmetic Relations in Mathematical Word Problems: Evidence from Event-related Brain Potentials.
- Eric Runeson, PhD in Psychology, UW, 2013. Effects of attention on physiological responses in human visual cortex.
- Peter Meilstrup, PhD in Neurobiology and Behavior, UW, 2014. Adding motion makes movement invisible: spatial interactions in visual motion.
- Shin Kira, PhD in Neurobiology and Behavior, UW, 2014. Neural mechanisms for decisions based on sequential samples of evidence.

Jared LeClerc, Phd in Psychology, UW, 2014. Communicating Weather and Climate Uncertainty: An Exploration of the Benefits and Limitations of Inclusion of Uncertainty Estimates.

Colin Beam, completed his generals in Psychology, UW, 2011.

Timothy Rich, completed his generals in Rehabilitation Medicine, UW, 2016.

Joris Vincent, working on his generals in Psychology, UW.

Raoni Demnitz, working on his generals in Psychology, UW.

Dean Pospisil, working on his generals in Neuroscience, UW.

James "Kit" Moreland, completed his first year project in Psychology, UW, 2015.

Post-Doctoral Students (helped supervise)

Karen Dobkins, Post-Doc. in Dr. Teller's lab, 1993-1995. Relevant papers include: Dobkins, K. R. & Teller, D. Y. (1996). Infant contrast detectors are selective for direction of motion. Vision Research, 36, 281-294. Became an professor at UCSD.

John Kelly, Post-Doc. in Dr. Teller's lab, 1993-1996. Relevant papers include: Kelly, J. P., Borchert, K., & Teller, D. Y. (1997). The development of chromatic and achromatic contrast sensitivity in infancy as tested with the sweep VEP. Vision Research, 37, 2057-2072. Moved to Children's Hospital and Medical Center, Seattle, WA.

Barry Lia, Post-Doc. in Dr. Teller's lab, 1994-1998. Relevant work includes: Lia, B., Dobkins, K. R., Palmer, J. & Teller, D. Y. (1999). Infants code the direction of chromatic quadrature motion. Vision Research, 39, 1783-1794. Moved to the University Hospital, Seattle, WA

Tuwani Rasengane, Post-Doc. in Dr. Teller's lab, 1996-1998. Relevant work includes: Rasengane, T. A., Palmer, J. & Teller, D. T. (2000). Infant light adaptation shows Weber's law at photopic illuminances. Vision Research, 41, 359-373. Now practicing Optometry in South Africa.

Alex Huk, Post-Doc. in Dr. Shadlen's lab, 2001-2004. Relevant work includes: Palmer, J., Huk, A. C. & Shadlen, M. N. (2005). The effect of stimulus strength on the speed and accuracy of a perceptual decision. Journal of Vision, 5, 376-404. Is now an associate professor at University of Texas, Austin.

Alex White, Post-Doc with Dr. Geoff Boynton and myself 2015-ongoing.

Undergraduate Students (Advised their research project)

Nobuko Murakami, BS in Psychology, 1989. Talk presented at the meeting of the Optical Society of America: Weber's law for separation is not due to eccentricity.

Eric Ruthruff, BS in Psychology, 1990. Project entitled: Measuring information-based and object-based limits on visual memory.

Britt Anderson, BS in Engineering, 1992, Paper entitled: Limited capacity for memory of multiple features within a single object.

Victor Nguyen, BS in Psychology, 2011, Project entitled: A filtering paradigm for selective attention in transparent motion.

James Pai, BS in Psychology, 2014. Project entitled: Are the divided attention effects in shape perception due to uncertainty in viewpoint?

Teaching Experience, Courses

Introductory Psychology, University of Michigan. Taught once in 1984, 30 students. Used H. Gleitman's text, Psychology.

Advanced Perception, University of Washington. Taught 6 times from 1985 to 1992, 10-30 students. Used L. Kaufman's text, Sight and Mind and extensive readings.

Sensation and Perception, University of Washington. Taught 6 times from 1985 to 1992, 50-100 students. Used R. Sekular and R. Blake's text, Perception.

Graduate Perception, University of Washington. Taught once in 1985, 4 students. Used extensive readings including sections of L. Kaufman's, Sight and Mind and G. Miller and P. Johnson-Laird's Language and Perception.

Sensation and Perception, Stanford University. Taught once in 1988, 180 students. Used R. Sekular and R. Blake's text, Perception.

Information Processing, University of Washington. Taught 4 times from 1987 to 1991, 10-30 students. Used C. Wickens's text, Engineering Psychology and Human Performance and extensive readings.

Advanced Perception, University of Washington. Taught 2 times from 2005 to 2007, 10-15 students. Used S. Palmer's Vision Science and extensive readings.

Vision and its Physiological Basis, University of Washington. Taught once in 2012, 12 students. Used D. Teller's unpublished Vision and the Visual System.

Teaching Experience, Seminars

Visual Memory and Spatial Vision, University of Washington. Winter 1985, 9 students and faculty. Reviewed the visual memory literature with a focus on spatial judgments.

Color Vision: Postreceptoral channels and the silent substitution paradigm, University of Washington. Winter 1986, 8 students and faculty. Taught jointly with Drs. Davida Teller and Steve Buck.

Human and Computer Vision, University of Washington. Spring 1987, 5 students. Related computational models in human and computer vision.

Attention, University of Washington. Winter 1988, 11 students and faculty. Reviewed the attention literature with a focus on visual search.

Retinal Eccentricity and Visual Function, University of Washington. Spring 1988, 14 students and faculty. Taught jointly with Dr. Davida Teller; we addressed work linking visual function to retinal anatomy.

The Psychophysics of Attention, Stanford University. Winter 1989, 10 students and faculty. In this seminar, we read extensively from M. Shaw's and N. Graham's work on visual attention.

Models of Computational Vision, University of Washington. Fall 1989, 13 students and faculty. Taught jointly with Dr. Robert Haralick; we used human psychophysics to analyze machine vision models.

Measuring Attention, University of Washington. Spring 1990, 8 students and faculty. Taught jointly with Dr. Barry Kantowitz; we concentrated on understanding how dual tasks measure attention.

Norma Graham on Vision and Attention, University of Washington. Fall 1990, 14 students and faculty. In this seminar, we read N. Graham's Visual Pattern's Analyzers from cover to cover.

Foundations of Attention, University of Washington. Fall 1991, 7 students and faculty. In this seminar, we analyzed definitional issues in attention.

Vision Lab, University of Washington. Summer 1993, 9 students and faculty. Taught jointly with Dr. Steve Buck; we taught the practical use of visual display and light calibration equipment.

The Neuroscience of Attention, University of Washington. Spring 1996. 12 students and faculty. In this seminar, we surveyed the literature on the neural basis of attention phenomena.

The Psychophysics of Attention, Presented as part of the Computational Neuroscience Course at the Cold Spring Harbor Laboratories. Summer 1996 and 1998. 30 Students and colleagues. Introduced quantitative work on attention in psychophysics as a complement to John Maunsell's presentation of neuroscience work on attention.

Survey of Attention, University of Washington. Winter, 1999. 15 students and faculty. In this seminar we read Hal Pashler's book, The Psychology of Attention from cover to cover. We had Hal "defend" his book at our last meeting.

Seminar on the Spatial Resolution of Attention, University of Washington. Spring 2006. 8 students and faculty. Organized jointly with Dr. Cathleen Moore of Penn State University. We reviewed in detail the literature on the spatial extent of visual attention.

Seminar on the Empirical Foundations of Attention, University of Washington. Spring 2007. 4 students and faculty. Organized jointly with Dr. Cathleen Moore of Penn State University. We reviewed seven key paradigms in selective and divided attention of perception and memory.

Seminar on Attention and Perceptual Organization, University of Iowa. Fall 2008. 10 students and faculty. Conducted with Dr. Cathleen Moore of University of Iowa. We reviewed the literature on the relation between perceptual organization and attention.
