Climate

Mainland Portugal is defined as having a Mediterranean climate, while also being one of the warmest countries in Europe. In early September, the weather in Guimarães should be relatively hot and dry. The average daily temperature varies between 20°C (68°F) and 25°C (77°F). Rainfall is highly unlikely during this particular period.

Electricity

The standard power supply in Portugal is 220-240V/50Hz and the power sockets are Type F (two-pins).

Currency & Banking

The currency in Portugal is the Euro (symbol: €). Money can be withdrawn from most international credit cards at one of the 13,000 ATM machines spread throughout the country (called *Caixas Multibanco*). Many shops and restaurants allow for credit card payment, however, not all of them do. Therefore, it is advisable to always bring some cash. Banks are open Monday to Friday from 8:30 to 15:00 and are closed on official holidays. The vast majority of shops and restaurants will only accept Euros for cash payment. Foreign currency can be exchanged at airports and banks.
