

## **Energy budget constraints on climate sensitivity in light of inconstant climate feedbacks**

Kyle C. Armour<sup>1</sup>

<sup>1</sup> *School of Oceanography and Department of Atmospheric Sciences, University of Washington, Seattle, WA 98195*

The following printing errors in the Methods section were noted after online publication:

- (i) Equation (6) in the Methods should read  $\Delta F(t) \approx F_{2\times} t/70$ , representing a doubling of CO<sub>2</sub> after 70 years, not 69 years.
- (ii) ECS was estimated by regression over years 21-150 of the abrupt CO<sub>2</sub> quadrupling simulations, not years 121-150.

I thank Nic Lewis for bringing these errors to my attention.
