

SPHSC 500 Examination
Autumn 2006
Take-home Component (15 points)

Bring your answer to class on Thursday, December 14, 10:30, typed, double spaced.

This question builds on Assignment #3 that you are completing for Dr. Coggins. Please answer the following – pay attention to length guidelines:

1. Provide a brief description of your client (approximately 75 words)
2. Briefly summarize the treatment approach you have investigated and are proposing to use. I need the name of the approach and a description of it (approximately 150 words).
3. Write a behavioral treatment objective for your client that could be accomplished in 1 quarter with meetings twice a week.
4. Based on the behavioral objective, describe a probe measure, including what, how, and when/how often you will measure.
5. In the spirit of multiple measures, describe a probe measure for generalization, including what, how and when/how often you will measure.
