

# Modeling Reflection

Read Cynthia Oropesa Anhalt and Ricardo Cortez's article: *Mathematical Modeling: A structured Process* Mathematics Teacher. Feb 2015 Vol. 108 Issue 6. It is available in Canvas if you don't want to find it through the UW library system.

1. [2] Your instructor grew up on a farm in Southern Oregon and participated in her local rabbit and steer 4H clubs. Your instructor thinks that is an interesting fact about herself. Tell her something interesting about yourself.
  
2. [4] Outline the steps taken to solve the modeling problem presented in the paper.
  
3. [4] Consider the rubric posted for the modeling HW and presentations. Is there something you think it is missing? Is there something you would not change? Explain your thoughts in less than 150 words and be prepared to discuss them in class!
