## Modeling Reflection 2

Read the model created Team $\# 30680$ developed in response to a prompt very close to $\# 2$ from your ModelingHW1 assignment. (You can see the exact problem prompt in the report.)

1. [4] Identify some of the different assumptions between Team \#30680's model and your own group's.
2. [3] Identify a mathematical concept/idea that the Team \#30680 considered but ultimately did not use in their model.
3. [3] Reflect on Team \#30680's approach in comparison to the approach taken by your group. Would you approach this problem differently now? If so, how? If not, explain why.
