

3D Printing HW3

It is time to print one of your files! Before the due date you must:

1. [5] go to the library and attempt to print your pattern
2. [3] *bring* in whatever it is that the printer printed (it does not have to resemble your original pattern)
3. [2] be prepared to point out any differences between your .stl file and the object printed.

A few more notes about when you are 3D printing:

1. Sign up on the sign-in sheet at the library, it does not need to be your real name.
2. Indicate the time your started and use the print-preview to estimate the print time as your “time out”.
3. Consider checking out <https://guides.lib.uw.edu/3D-Printing>
