

tc core 102: Quiz 6

Key

You will see this same quiz in Canvas Question 1 and Canvas Question 2.

Canvas Question 1: You have 30 minutes to complete the quiz and upload an answer. You can use a calculator and a five-sided 3x5" notecard with anything written or typed on it.

Canvas Question 2: You have 30 minutes to complete the quiz and upload an answer. You may work with your group and any materials provided inside the Canvas course.

LOTS of correct answers?

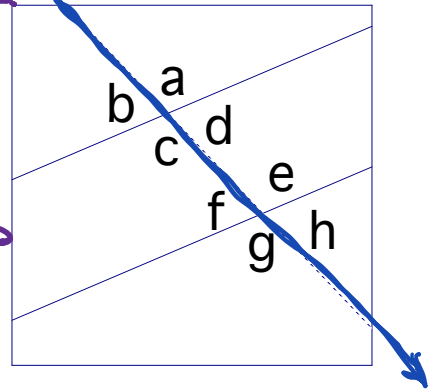

- [3] Identify two factors that should be taken into account or two people who should be consulted before transitioning a course to a NonStandard (NS) grading option.

start (+.5)
each reason (+2)
sense (+.5)

people to consult: academic advisor to see effect on academic plan
financial aid adviser
course instructor

factors: is class needed for major?

- [3] Identify a pair of corresponding angles from the figure on the right.

There are LOTS of right answers here?

start (+.5)
angle (+.5)
identify (+.5)

ex a and e d and h
b and f c and g

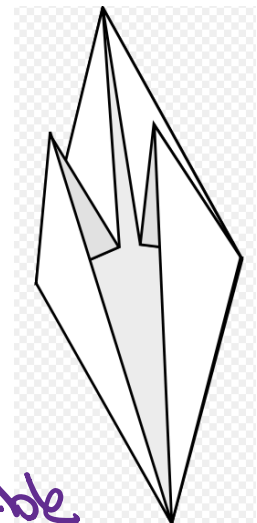

two angles (+.5) got it (+1)

- Consider the figure on the right for the following two questions.

- [2] Identify the name of the base shown on the right.

fish base (+1)

start (+.5)
language from Leng/Class (+.5)

- [2] Identify how many flaps the base shown has.

4 (+1) (2 long and 2 short flaps)
note that 2 is an acceptable answer too. :)

start (+.5) 2 or 4 (+.5)
