

Group Member Assessment

Recall that one fourth of the marks for the written discussion portion of Project 1 is determined by the group members.

Each member of the group will turn in the following form where they can distribute the “Total” points available in a manner that they deem fair and reflective of the group dynamic that they experienced.

Detailed Instructions

- 1) Specify the members of your group below. (Including yourself.)
- 2) Count up the number of people in each group (call it n) and multiply by 16.

This will be the “Total” points that you can assign.

- 3) For each member, indicate
 - a) your perceived level of involvement on a scale between 0 and 8*n
 - b) your perceived level of contributions on scale between 0 and 8*n

Details about the range of numbers to assign:

Each member's points must be an integer greater than 0.
 If evenly divided, each member would earn 8 points in each category.
 The columns should add to 8*n

Names of Group Members:	Involvement	Contributions
▪		
▪		
▪		
Total		

For example: note there are three group members

Names of Group Members:	Involvement	Contributions
talented procrastinator	6	11
dilligent but confused	10	5
capabile, responsive & helpful	8	8
Total	24	24
