NAME:

1. [2] TRUE/FALSE: Circle T in each of the following cases if the statement is always true. Otherwise, circle F. Let $f$ be a function, and $x, y$, and $z$ be real numbers with $z \neq 0$.
$\mathrm{T} \quad \mathrm{F} \quad \frac{x-1}{x} \cdot \frac{x+1}{2}=\frac{2(x-1)+x(x+1)}{2 x}$
T F 1 radian $\approx 57^{\circ}$

Show your work for the following problems. The correct answer with no supporting work will receive NO credit (this includes multiple choice questions).
2. [4] (§1.1 \#78) Find the graph of a function $\alpha$ so that the points $(x, y)$ on the graph of $\alpha$ if and only if $(x, y)$ is the same distance from the two points $(3,1)$ and $(-2,0)$.
3. [4] (exponent wks \#4) Find any real or imaginary $x$ such that $4 x^{-1}-7 x^{-2}=1$.
4. [3] (PracticeExam2 \#4) Simplify $\frac{\sqrt[3]{x}\left(y^{-4}\right)^{\frac{3}{2}}}{x^{2} y^{-5}}$
5. Let $f$ be the function whose graph is below:
(a) [2] (Quiz2 \#2a) What is the domain of $f$ ?
(b) $[2](\S 3.2 \# 62)$ Find the function of the form $f(x)=\log _{b}(x)$.

|  |  |  |  |  | ${ }^{\circ}$ |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
| 5-5 | -4 | - | 3 | 2 | 0 |  |  |  |  | ${ }^{5}$ | ${ }^{5}$ |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |

(c) [3] (PracticeExam2 \#9c) Notice that $f$ passes the horizontal line test, so $f^{-1}$ exists. Find $f^{-1}$.
(d) [3] (WebHW7 \#22) Sketch the graph of $f(x+2)+1$ on the axes above.
6. [3] (§4.1) Draw the angle $\frac{-4 \pi}{3}$ in standard position.
7. Let $h$ be the piece-wise defined function:

$$
h(x)= \begin{cases}x(x-1)(x+3)^{2} & \text { if } x \leq 1 \\ 2^{x} & \text { if } 1<x\end{cases}
$$

(a) [3] (WebHW6 \#9) Identify each real zero.
(b) $[4](\S 2.2 \# 52 \& W e b H W 7 \# 14)$ Graph $h$.
$\left.\begin{array}{|r|r|r|r|r|l|l|l|l|l|}\hline & & & & y_{4}^{5} & & & & & \\ \hline\end{array}\right)$
8. Solve for $x$ in the following:

$$
\begin{aligned}
& {[4](\S 3.4 \# 68)} \\
& \log _{6}(x+2)-\log _{6}(x-3)=1
\end{aligned}
$$

[3] (WebHW8 \#13)
$3 \cdot 2^{3 x-2}+4=15$.
9. (WebHW9 \#7) The pH of a solution is given by the formula $\mathrm{pH}=-\log \left[H^{+}\right]$where $\left[\mathrm{H}^{+}\right]$is the hydrogen ions concentration in moles per liter. The pH of solution A is 2.6 and the pH solution of $B$ is 10.6 .
(a) [2] Find the hydrogen-ion concentration of solution B.
(b) [2] How many times less is the hydrogen-ion concentration of solution B to solution A?
10. [6] Choose $O N E$ of the following. Clearly identify which of the two you are answering and what work you want to be considered for credit.
No, doing both questions will not earn you extra credit.
(a) (WebHW9 \#5) The population of a town was 6,000 in 1990 and grew to 8,000 in 2000. Assume that the population will continue to grow exponentially.
i. [4] What will the population be in 2015 ?
ii. [2] When will the population hit 12,000 ?
(b) (WordWks \#4) Chad just graduated but does not have a job lined up yet. In his last year of graduate school he made ends meet by using his credit card and now has a balance of $\$ 9,000$. His credit card compounds monthly with an annual interest rate of $14.9 \%$.
i. [3] Assume the worst and that Chad won't be able to make any payments on his credit card bill. How much will he owe on his credit card after two years (ignoring late fees)?
ii. [3] Just before graduation, Chad received an ad for a State Farm Good Neighbor Visa Credit Card. The card will transfer his balance (with a $2.90 \%$ balance transfer fee) with an annual interest rate of $10.24 \%$, compounded monthly. How much will Chad owe after two years if he transfers to the new card (ignoring late fees)?
