## What is Preparation for Industrial Careers in Mathematics “PIC” Math Course?

We'll talk about mathy jobs in the real world and some of the obvious and less obvious skills needed for them. We'll visit overviews of four exciting projects you have the opportunity to work on in Winter 2017. We'll go over what you need to do to enroll in the course, how the course will be structured, and what additional work you'll need to do if the course is to be used for your capstone.
