

## Publications of Michael Schick

### 1968

M. Schick, "Flux Quantization in a One-Dimensional Model", Phys. Rev. **166**, 404 (1968).

### 1969

H. Gutfreund and M. Schick, "Momentum Distribution in the Tomonaga Model", Phys. Rev. **168**, 418 (1969).

M. Schick and P.R. Zilsel, "New Manifestations of the Josephson Effect in Helium", J. Low Temp. Phys. **1**, 385 (1969).

M. Schick and T.M. Wu, "Charged Bose Gas", Phys. Rev. **177**, 313 (1969).

M. Schick and P.R. Zilsel, "Order Parameter, Mean Field Theory, and the Ideal Bose Gas", Phys. Rev. **188**, 522 (1969).

### 1970

M. Schick and C.E. Campbell, "Substrate Mediated Interaction between Adsorbed Atoms", Phys. Rev. **A2**, 1591 (1970).

### 1971

M. Schick, "Two Dimensional System of Hard Core Bosons", Phys. Rev. **A3**, 1067 (1971).

C.E. Campbell and M. Schick, "Ground State of  $^4\text{He}$  Monolayers Adsorbed on Inert Substrate", Phys. Rev. **A3**, 691 (1971).

C.E. Campbell, J.G. Dash, and M. Schick, "Effects of Lateral Fields on Helium Monolayers", Phys. Rev. Lett. **26**, 966 (1971).

### 1972

C.E. Campbell and M. Schick, "Triangular Lattice Gas", Phys. Rev. **A5**, 1919 (1972).

C.E. Campbell, F.J. Milford, A.D. Novaco, and M. Schick, "Helium Monolayer Completion on Graphite", Phys. Rev. **A6**, 1648 (1972).

### 1973

Y.C.-Cheng and M. Schick, "Quantum Lattice Gas Model for  $^3\text{He}-^4\text{He}$  Mixtures", Phys. Rev. **A7**, 1771 (1973).

M. Schick and R.L. Siddon, "Ordering Transitions in Quantum Lattice Gas Model of Adsorbed Systems", Phys. Rev. **A8**, 339 (1973).

R.L. Siddon and M. Schick, "Second Virial Coefficients of Two Dimensional Systems of  $^3\text{He}$  and  $^4\text{He}$ ", *Monolayer and Submonolayer Helium Films*, J.G. Daunt and E. Lerner eds. (Plenum, New York 1973) p65.

#### 1974

Y.C.-Cheng and M. Schick, "Quantum Lattice Gas Model of  $^3\text{He} - ^4\text{He}$  Mixtures", *Low Temperature Physics LT-13*, Vol. 1, 112 (1974).

R.L. Siddon and M. Schick, "Spatial Ordering Transitions in Quantum Lattice Gases", *Low Temperature Physics LT-13*, Vol. 1, 152 (1974).

R.L. Siddon and M. Schick, "Low Density Helium Monolayers as Two-Dimensional Imperfect Gases: An Analysis Employing the Second Virial Coefficient", *Phys. Rev.* **A9**, 907 (1974).

R.L. Siddon and M. Schick, "Second Virial Coefficients of Two-Dimensional Helium: The Beck Potential", *Phys. Rev.* **A9**, 1753 (1974).

R. L. Siddon and M. Schick, "Second Virial Coefficients of Adsorbed Para Hydrogen", *J. Low. Temp. Phys.* **17**, 489 (1974).

#### 1975

J.G. Dash and M. Schick, "Helium Monolayers" in *Physics of Solid and Liquid Helium*, Part II, K.H. Benneman and J.B. Ketterson eds. (Wiley, New York, 1975) p. 497.

#### 1976

L.W. Bruch, M. Schick, and R.L. Siddon, "Limitation on the Quantum Mechanical Extension of Baierlein's Theorem", *Am. J. Phys.* **44**, 1007 (1976).

M. Schick, J.S. Walker, and M. Wortis, "Antiferromagnetic Triangular Ising Model", *Phys. Lett.* **58A**, 479 (1976).

#### 1977

E. Domany, M. Schick, and J.S. Walker, "Classification of Order-Disorder Transitions in Common Adsorbed Systems: Realization of the Four-State Potts Model", *Phys. Rev. Lett.* **38**, 1148 (1977).

M. Schick, J.S. Walker, and M. Wortis, "Phase Diagram of the Triangular Ising Model: Renormalization Group Calculation with Application to Adsorbed Monolayers", *Phys. Rev.* **B16**, 2205 (1977).

M. Schick, J.S. Walker, and M. Wortis, "Properties of the Triangular Lattice Gas with Repulsive Interactions", *J. de Physique* **C4**, C4-121 (1977).

M. Schick and R.B. Griffiths, “Antiferromagnetic Ordering in the Three-State Potts Model”, J. Phys. **A10**, 2123 (1977).

### 1978

H.J. Hilhorst, M. Schick, and J.M.J. van Leeuwen, “Differential Form of Real Space Renormalization: Exact Results for Two-Dimensional Ising Models”, Phys. Rev. Lett. **40**, 1605 (1978).

E. Domany, M. Schick, J.S. Walker, and R.B. Griffiths, “Classification of Continuous Order-Disorder Transitions in Adsorbed Monolayers”, Phys. Rev. **B18**, 2209 (1978).

### 1979

H.J. Hilhorst, M. Schick, and J.M.J. van Leeuwen, “Exact Renormalization Group Equations for the Two-Dimensional Ising Model”, Phys. Rev. **B19**, 2749 (1979).

E. Domany, M. Schick, and J.S. Walker, “Proposed Structure of H on Ni(111)”, Solid State. Comm. **30**, 331 (1979).

J.S. Walker and M. Schick, “Order Disorder Transitions to (2x2) Structures”, Phys. Rev. **B20**, 2088 (1979).

E. Domany and M. Schick, “Classification of Order-Disorder Transitions in Adsorbed Monolayers II”, Phys. Rev. **B9**, 3828 (1979).

B. Nienhuis, A.N. Berker, E.K. Riedel, and M. Schick, “First- and Second-Order Phase Transitions in Potts Models: Renormalization Group Solution”, Phys. Rev. Lett. **43**, 737 (1979).

### 1980

B. Nienhuis, E. Riedel, and M. Schick, “Variational Renormalization-Group Approach to the q-State Potts Model in Two Dimensions,” J. Phys. **A13**, L31 (1980).

M. Schick, “Theory of Helium Monolayers,” in *Phase Transitions in Surface Films*, ed. J.G. Dash and J. Ruvalds (Plenum, New York, 1980), p. 65

M. Schick, “Ferromagnetism in Two Dimensions: Some Models and Applications,” in *Felix Bloch and Twentieth-Century Physics*, M. Chodorow, R. Hofstadter, H.E. Rorshach, and A.L. Schawlow eds. (Rice, Houston 1980) p179.

B. Nienhuis, E. Riedel, and M. Schick, “Magnetic Exponents of the Two-Dimensional q-State Potts Model,” J. Phys. **A13**, L189 (1980).

W. Kinzel, N. Berker, and M. Schick, “Honeycomb Lattice Gas: Application to Adsorbed Systems,” in *Ordering in Two Dimensions* S. Sinha ed. (North Holland, New York, 1980), p. 381

J. Callaway and M. Schick, "Calculation of Finite-Size Effects and Determination of Characteristic Substrate Sizes," in *Ordering in Two Dimensions* S. Sinha ed. (North Holland, New York, 1980), p. 385

## 1981

B. Nienhuis, E. Riedel, and M. Schick, "The q-State Potts Model in General Dimension," *Phys. Rev.* **B23**, 6055 (1981).

W. Kinzel and M. Schick, "Phenomenological Scaling Approach to the Triangular Ising Ferromagnet," *Phys. Rev.* **B23**, 3435 (1981).

J. Callaway and M. Schick, "Calculation of Finite-Size Effects and Extraction of Surface Characteristics," *Phys. Rev.* **B23**, 3494 (1981).

W. Kinzel and M. Schick, "Extent of Exponent Variation in a Hard-Square Lattice Gas with Second-Neighbor Repulsion," *Phys. Rev.* **B24**, 324 (1981).

S. Fain and M. Schick, "Two-Dimensional Physisorbed Phases," *J. Vac. Sci. Technol.* **18**, 501 (1981).

M. Schick, "Oxygen on Ni(111): A Transition of the Heisenberg Model with Cubic Anisotropy," *Phys. Rev. Lett.* **47**, 1347 (1981).

M. Schick, "Classification of Order-Disorder Transitions on Surfaces," *Prog. Surf. Sci.* **11**, 245 (1981).

## 1982

M. Schick, "Order-Disorder Transitions on Surfaces: A Summary of Recent Activity," *Physica* **109B** and **110B**, 1811 (1982).

M. Schick, "Application of the Real-Space Renormalization to Adsorbed Systems," in *Real Space Renormalization*, ed. Burkhardt and van Leeuwen (Springer Verlag, Berlin, 1982), p. 149.

M.P. Nightingale and M. Schick, "Three-State Square Lattice Potts Antiferromagnet," *J. Phys. A: Math. Gen.* **15**, L39 (1982).

M.P.M. den Nijs, M.P. Nightingale, and M. Schick, "Critical Fan in the Antiferromagnetic Three-State Potts Model," *Phys. Rev.* **B26**, 2490 (1982).

R. Pandit, M. Wortis, and M. Schick, "Multilayer Adsorption: A Unified Picture," in *Melting, Localization and Chaos*, ed. R. Kalia and P.D. Vashista (North Holland, New York, 1982), p. 13.

R. Pandit, M. Schick, and M. Wortis, "Systematics of Multilayer Adsorption Phenomena on Attractive Substrates," *Phys. Rev.* **B26**, 5112 (1982).

### 1983

M. Schick, "Application of the Heisenberg Model with Cubic Anisotropy to Phase Transitions on Surfaces," *Surf. Sci.* **125**, 94 (1983).

J.L. Cardy, M.P.M. den Nijs, and M. Schick, "Transitions of an Internal Degree of Freedom Within an Incommensurate Phase," *Phys. Rev.* **B27**, 4251 (1983).

E.H. Hauge and M. Schick, "Continuous and First-Order Wetting Transition from the van der Waals Theory of Fluids," *Phys. Rev.* **B27**, 4288 (1983).

B. Nienhuis, E.K. Riedel, and M. Schick, "Critical Behavior of the N-Component Cubic Model and the Ashkin-Teller Fixed Line," *Phys. Rev.* **B27**, 5625 (1983).

M.P. Nightingale, W.F. Saam, and M. Schick, "Absence of Critical Wetting in Systems with Long-Range Forces," *Phys. Rev. Lett.* **51**, 1275 (1983).

### 1984

F.T. Gittes and M. Schick, "Complete and Incomplete Wetting by Adsorbed Solids," *Phys. Rev.* **B30**, 209 (1984).

E. Domany, M. Schick, and R.H. Swendsen, "First Order Transition in an XY Model with Nearest Neighbor Interactions," *Phys. Rev. Lett.* **52**, 1535 (1984).

M.P. Nightingale, W.F. Saam, and M. Schick, "Wetting and Growth Behaviors in Adsorbed Systems with Long-Range Forces," *Phys. Rev.* **B30**, 3830 (1984).

### 1985

S. Dietrich and M. Schick, "Critical Wetting of Surfaces in Systems with Long-Range Forces," *Phys. Rev. B* **31**, 4718 (1985).

G. Forgacs, H. Orland, and M. Schick, "Dynamics of the Critical Wetting Transition," *Phys. Rev. B* **31**, 7434 (1985).

M. Schick, "Comment on 'Substrate-Induced Orientational Order in the Isotropic Phase of Liquid Crystals,'" *Phys. Rev. Lett.* **31**, 2169 (1985).

S. Dietrich, M.P. Nightingale, and M. Schick, "Applicability of Mean-Field Theory in Binary-Liquid Mixtures," *Phys. Rev. B* **32**, 3182 (1985).

G. Forgacs, H. Orland, and M. Schick, "Wetting of a Disordered Substrate," *Phys. Rev. B* **32**, 4683 (1985).

### 1986

G. Forgacs, H. Orland, and M. Schick, "Irrelevance of Bulk Symmetry to Critical Wetting," *Phys. Rev. B* **33**, 95 (1986).

S. Dietrich and M. Schick, “The Order of Wetting Transitions,” Phys. Rev. B **33**, 4952 (1986)

B. Derrida and M. Schick, “Interfacial Wetting in the q-State Potts Model,” J. Phys. A. **19**, 1439 (1986)

M. Schick and Wei-Heng Shih, “Spin-One Model of a Microemulsion”, Phys. Rev. **34**, 1797 (1986)

A.D. Migone, J.G. Dash, M. Schick, and O.E. Vilches, “Triple Point Wetting of Neon Films”, Phys. Rev. **B34**, 6322 (1986)

### 1987

J. Adler, Y. Gefen, M. Schick, and Wei-Heng Shih, “Order Propagation in Dilute Antiferromagnetic Potts Models”, J. Phys. A **20**, L227 (1987)

M. Schick and Wei-Heng Shih, “Z(N) Model of Grain-Boundary Wetting”, Phys. Rev. **B35**, 5030 (1987)

M. Schick and Wei-Heng Shih, “Simple Microscopic Model of a Microemulsion”, Phys. Rev. Lett. **59**, 1205 (1987)

J.G. Dash, M. Schick, and J. Suzanne, “Wetting Phenomena and Crystal Growth”, Ann. Phys. Fr. **12**, 299 (1987)

### 1988

Guozhong An and M. Schick, “Surface Melting and the Surface Phase Diagram”, Phys. Rev. **B37**, 7534 (1988)

Guozhong An and M. Schick, “Onset of Bulk Behavior in a Finite Thickness Slab”, J. Phys. A. **21**, L213 (1988)

Harry Fried and M. Schick, “Nonlocal Percolation in an antiferromagnetic Potts model”, Phys. Rev. **B38**, 954 (1988)

Gilson Carneiro and M. Schick, “Simple Model for Ternary Mixtures with Non-Ionic Surfactants”, J. Chem. Phys. **89**, 4368 (1988)

### 1989

G. Gompper and M. Schick, “Microemulsion Structure from a Three-Component Lattice Model”, Phys. Rev. Lett. **62**, 1647 (1989)

G. An and M. Schick, “Surface Melting in a Two-Dimensional Model”, Phys. Rev. **B 39**, 9722 (1989).

G. Gompper and M. Schick, "Phase and Scattering Behavior of Disordered Aqueous Surfactant Solutions as the Binary Limit of Ternary Microemulsions", Chem. Phys. Lett., **163**, 475 (1989).

## 1990

H. Fried and M. Schick, "New Percolation Structures in Dilute Antiferromagnetic Potts Models", Phys. Rev. **B41**, 4389 (1990).

G. Gompper and M. Schick, "A Lattice Model of Microemulsions", Phys. Rev. **B41**, 9148 (1990)

G. Gompper and M. Schick, "A Lattice Model of Microemulsions II, The Effect of Fluctuations in One and Two Dimensions", Phys. Rev. **A42**, 2137 (1990)

G. Gompper and M. Schick, "Correlation between Structural and Interfacial Properties of Amphiphilic Systems", Phys. Rev. Lett. **65**, 1116 (1990)

M. Schick, "An Introduction to Wetting Phenomena", in "Liquids at Interfaces, Proceedings of the Les Houches 1988 Session XLVIII ", J. Charvolin, J.-F. Joanny and J. Zinn-Justin eds., North Holland. p. 416

A. Martino, M. Schick, and E.W. Kaler, "A four component lattice model for nonaqueous microemulsions made with nonionic surfactants", J. Chem. Phys. **93**, 8228 (1990)

## 1991

R. Hołyst, G. Gompper, and M. Schick, "Interfacial Properties of Amphiphilic Systems; The Approach to Lifshitz Points", Phys. Rev. **A43**, 3157 (1991).

T. Garel, J.C. Niel, H. Orland, and M. Schick, "Static and Dynamic Aspects of Disorder Lines", J. Phys. **A24**, 1245 (1991).

M. Elbaum and M. Schick, "Application of the Theory of Dispersion Forces to the Surface Melting of Ice", Phys. Rev. Lett. **66**, 1713 (1991).

M. Schick, "Lattice Model of Microemulsions: A Review", Physica **A172**, 200 (1991).

R. Blossey and M. Schick, "Percolation Thresholds near Lower Critical Points", Phys. Rev. **A 44**, 1134 (1991).

A. Hansen, M. Schick, and D. Stauffer, "Generalized Widom Model of Amphiphilic Systems", Phys. Rev. **A 44**, 3686 (1991).

M. Elbaum and M. Schick, "On the Failure of Water to freeze from its Surface", J. Physique **I,1**, 1665 (1991).

## 1992

R. Hołyst and M. Schick, “Mixtures of Stiff and Flexible Main Chain Nematogenic Polymers”, J. Chem. Phys. **96**, 721 (1992).

R. Hołyst and M. Schick, “Correlations in a Rigid-Flexible Diblock Copolymer System”, J. Chem. Phys. **96**, 730 (1992).

M. Schick, “Microscopic Model of Amphiphilic Systems” in *Organized Solutions*, S. Friberg and B. Lindemann eds. (Marcel Dekkar, New York, 1992), p. 23

M. Schick, “A Landau Approach to Interfacial Properties of Amphiphilic Systems”, in *Lectures on Thermodynamics and Statistical Mechanics*, M.L. de Haro and C. Varea eds., (World Scientific, Singapore, 1992)

R. Hołyst and M. Schick, “Copolymers as Amphiphiles in Ternary Mixtures”, J. Chem. Phys. **96**, 7728 (1992).

J. Putz, R. Hołyst and M. Schick, “Non-Monotonic Behavior of Contact Angle on Approaching Critical Endpoints”, Phys. Rev. **A46**, 3369 (1992).

J. Lerczak, M. Schick, and G. Gompper, “Variation with Amphiphilic Strength of the Properties of Ternary Mixtures”, Phys. Rev. **A46**, 985 (1992).

M. Schick and Peter Taborek, “Anomalous Nucleation at First-Order Wetting Transitions”, Phys. Rev. **B46**, 7312 (1992) (Rapid Communication).

### 1993

M. Matsen, M. Schick, and D.E. Sullivan, “Evolution with Temperature of the Middle Phase from Micellar to Bicontinuous Microemulsion”, J. Chem. Phys. **98**, 2341 (1993).

M. Matsen and M. Schick, “Elastic Properties of an Interface of Diblock Copolymer”, *Macromolecules* **26**, 3878 (1993).

F. Schmid and M. Schick, “Phase Transitions of a Confined Complex Fluid” Phys. Rev. **E48**, 1882 (1993).

J. Putz, R. Hołyst, and M. Schick, “Nonmonotonic Behavior of a Contact Angle on Approaching Critical End Points”, (errata) , Phys. Rev. **E48**, 635 (1993).

M. Schick, “Interfacial Properties of Amphiphilic Systems”, *Journal de Physique IV, Colloque C1*, Vol. 3, 47 (1993).

M. Schick and O.E. Vilches, “Interplay of Superfluidity and Phase Separation in Adsorbed Films”, Phys. Rev. **E48**, 9910 (1993).

### 1994

J.G. Dash, M. Schick, and O.E. Vilches, “Phases of Helium Monolayers: Search and Discovery” *Surf. Sci.* **299/300**, 405 (1994).

F. Schmid and M. Schick, “Monte Carlo Studies of Interfacial Properties in an Amphiphilic System”, *Phys. Rev.* **E49**, 494 (1994).

M.W. Matsen and M. Schick, “Lamellar Phase of a Symmetric Triblock Copolymer”, *Macromolecules* **27**, 187 (1994).

G. Gompper and M. Schick, “Scattering from Internal Interfaces in Microemulsion and Sponge Phases”, *Phys. Rev.* **E49**, 1478 (1994).

G. Gompper and M. Schick, “Self-Assembling Amphiphilic Systems”, Vol. 16, of *Phase Transitions and Critical Phenomena*, C. Domb and J. Lebowitz eds., (Academic, London).

M.W. Matsen and M. Schick, “Elastic Properties of an Interface of Diblock Copolymer. 2” *Macromolecules* **27**, 2316 (1994).

M.W. Matsen and M. Schick, “Stable and Unstable Phases of a Diblock Copolymer Melt”, *Phys. Rev. Lett.* **72**, 2660 (1994).

M.W. Matsen and M. Schick, “Stable and Unstable Phases of a Linear Multiblock Copolymer”, *Macromolecules*, **27**, 7157 (1994).

M.W. Matsen and M. Schick, “Microphases of a Diblock Copolymer with Conformational Asymmetry”, *Macromolecules*, **27**, 4014 (1994).

M.W. Matsen and M. Schick, “Microphase Separation in a Starblock Copolymer Melt”, *Macromolecules*, **27**, 6761 (1994).

G. Gompper and M. Schick, “Lattice Theories of Microemulsions”, in *Modern Ideas and Problems in Amphiphilic Science*, W.M. Gelbart, D. Roux, and A. Ben-Shaul eds., (Springer Verlag, Berlin), p. 395.

## 1995

F. Schmid and M. Schick, “Liquid Phases of Langmuir Monolayers”, *J. Chem. Phys.* **102**, 2080 (1995).

F. Schmid and M. Schick, “Effect of Capillary Wave Fluctuations on Wetting Transitions in Balanced Amphiphilic Systems”, *Z. Phys.* **B97**, 189 (1995)

F. Schmid and M. Schick, “Effects of Fluctuations on the Wetting Transition in Amphiphilic Systems”, *J. Chem. Phys.* **102**, 7197 (1995).

L.A. Wilen, J.S. Wettlaufer, M. Elbaum, and M. Schick, “Dispersion Force Effects in Interfacial Premelting of Ice”, *Phys. Rev.* **B52**, 12426 (1995).

M. Schick, "Ternary Amphiphilic Systems", Chapter 14 of "Statistical Mechanics of Phases, Interfaces, and Thin Films", H. Ted Davis, (Wiley-VCH, New York, 1995).

## 1996

H. Orland and M. Schick, "Simple Integral Equation for the Polymer Brush", *Macromolecules* **29**, 713 (1996).

R.R. Netz and M. Schick, "Pore Formation and Rupture in Fluid Bilayers", *Phys. Rev. E* **53**, 3875 (1996).

M. Schick, "Wetting, Unbinding, and Ultralow Tensions in Amphiphilic Systems", *Ber. Bunsenges. Phys. Chem* **100**, 272 (1996).

P.K. Janert and M. Schick, "First-order unbinding and pre-unbinding in amphiphilic systems", *Phys. Rev. E* **54**, R33 (1996).

M. Schick, "Statistical Thermodynamics of surfaces, interfaces, and membranes", (book review) *Physics Today* **49** 68 (1996).

R.R. Netz and M. Schick, "Liquid-crystalline phases of semiflexible diblock copolymer melts", *Phys. Rev. Lett.* **77** 302 (1996).

M. Matsen and M. Schick, "Self-assembly of block copolymers" *Current Opinion in Colloid and Interface Science* **1**, 329 (1996).

J.I. Martin, Z.-G. Wang, and M. Schick, "Effects of Polymer Brush Self-Assembly on Spreading and Thin Film Stability", *Langmuir* **12**, 4950 (1996).

M. Müller and M. Schick, "Structure and nucleation of pores in polymeric bilayers; a Monte Carlo simulation", *J. Chem. Phys.* **105**, 8282 (1996)

M. Müller and M. Schick, "Bulk and interfacial thermodynamics of a symmetric, ternary homopolymer-copolymer mixture; a Monte Carlo study", *J. Chem. Phys.* **105**, 8885 (1996)

M. Schick, "Ordered Phases of Complex Fluids" in "Statphys 19", H. Bailin ed. (World Scientific, Singapore 1996), p263.

M. Müller and M. Schick, "Ordered Phases in rod-coil diblock copolymers", *Macromolecules* **29** 8900 (1996).

## 1997

P.K. Janert and M. Schick, "Phase Behavior of Ternary Homopolymer/Diblock Blends: Influence of Relative Chain Lengths" *Macromolecules* **30**, 137 (1997).

S. Dietrich and M. Schick, "Wetting at a Solid-liquid-liquid-vapor tetra point", Surf. Sci. **382**, 178 (1997).

R.R. Netz and M. Schick, "Classical theory of polymer brushes", Europhys. Lett. **38** (1) 37 (1997).

P.K. Janert and M. Schick, "Phase Behavior of Ternary Homopolymer/Diblock Blends: Microphase Unbinding in the Symmetric System", Macromolecules **30**, 3916 (1997).

R.R. Netz, D. Andelman, and M. Schick, "Interfaces of modulated phases", Phys. Rev. Lett. **79**, 1058 (1997)

### 1998

S Villain-Guillot, R.R. Netz, D. Andelman, and M. Schick, "Interfaces and Grain Boundaries of Lamellar Phases", Physica **A249**, 285 (1998)

M. Schick, "Avatars of the Gyroid", Physica **251**, 1 (1998).

P.K. Janert and M. Schick, "Phase Behavior of Binary Homopolymer/Diblock Blends: Temperature and Chain Length Dependence", Macromolecules **31**, 1109 (1998).

M. Müller and M. Schick, "Calculation of the phase behavior of lipids", Phys. Rev. **E57**, 6973 (1998).

R.R. Netz and M. Schick, "Polymer brushes: From self-consistent field to classical theory", Macromolecules **31**, 5105 (1998).

H. Wennerström and M. Schick, "Theory of Self-Assembly: Editorial Overview", Curr. Opin Colloid Interface Sci **3**, 415 (1998).

M. Moldover and M. Schick, "Introduction to 'Critical Point Wetting' by John Cahn" in The Selected Works of John W. Cahn, edited by W. Craig Carter and William C. Johnson, (The Mineral, Metals & Materials Society, 1998)

### 1999

G. Gompper and M. Schick, "Microscopic models of microemulsions" (in "Handbook of Microemulsion Science and Technology" P. Kumar and K.L. Mittal eds., Marcel Dekker, New York, 1999).

### 2000

X.-j. Li and M. Schick, "Theory of Lipid Polymorphism: Application to Phosphatidylethanolamine and Phosphatidylserine", Biophys. J. **78**, 34 (2000).

Y. Tsori, D. A. Andelman, and M. Schick, "Defects in Lamellar Diblock Copolymers: Chevron- and Omega-shaped Tilt Boundaries" Phys. Rev. **E61**, 2848 (2000)

X.-j. Li and M. Schick, "Distribution of Lipids in Non-Lamellar Phases of their Mixtures" J. Chem. Phys. **112**, 6063 (2000).

X.-j. Li and M. Schick, "Fluctuations in mixtures of lamellar- and non-lamellar-forming lipids" J. Chem. Phys. **112**, 10599 (2000).

Daniel Duque and M. Schick, "Self Consistent Field Theory of Twist Grain Boundaries in Block Copolymer Systems", J. Chem. Phys., **113**, 5525 (2000).

### 2001

X.-j. Li and M. Schick, "Theory of tunable pH sensitive vesicles of anionic and cationic lipids or anionic and neutral lipids" Biophys. J., **80**, 1703 (2001).

X.-j. Li and M. Schick, "Self-assembly of copolymers and lipids" Cond. Mat. Phys., **4**, 1 (2001).

### 2002

M. Müller, K. Katsov, and M. Schick, "New mechanism of membrane fusion", J. Chem. Phys. **116**, 2342 (2002).

D. Duque, X.-j. Li, K. Katsov, and M. Schick, "Molecular theory of hydrophobic mismatch between lipids and peptides" J. Chem. Phys. **116**, 10478 (2002).

D. Duque, K. Katsov, and M. Schick, "Theory of T-junctions and symmetric tilt grain boundaries in pure and mixed polymer systems" J. Chem. Phys. **117**, 10315 (2002).

### 2003

M. Scoville-Simonds and M. Schick, "Theory of the effect of unsaturation on the main chain transition", Phys. Rev. **E67**, 011911 (2003).

M. Mueller, K. Katsov, and M. Schick "A new mechanism of model membrane fusion determined from Monte Carlo simulation", Biophys. J. **85** 1611 (2003)
