

Below are a list of readings that will assist you with getting familiar with the research fields of eyewitness psychology and juror decision-making. The readings on this list will be modified depending upon the current research projects that we have going in the laboratory at any one time. The list is divided into three sections. The first section, **Primary lab readings**, is mandatory reading for all individuals in the laboratory. These readings will serve to provide you with a general overview of research in the area of legal psychology. It is imperative that you read these publications within the first week you are a member of the laboratory. The second section, **General lab readings**, will further serve to familiarize you with our research areas. While we do not require you to read these readings within the first few weeks, you should familiarize yourself with these publications within the first couple months you are a CASCR member. Finally, the third section, **Beneficial for current projects/projects under development**, is precisely what it claims to be. These readings will be assigned to each undergraduate RA depending upon which project(s) you are personally involved with. Any questions that you may have regarding the readings should be directed to the Lab Coordinator or Dr. Ross.
