Standard Operating Safety Procedures for Keller Lab for…

ACID CLEANING

Those workers who clean glassware with acid (No-chromix in sulfuric acid) should:
- Use the hood in Bagley 23.
- Wear labcoats, gloves, and eye protection.
- Keep waste in a glass container with a safety vent cap.
- Never put any organic material in the acid waste.
- Be aware of the location of the safety shower.
- Keep all hood sashes at a low level when not working in the hood.

I certify that I have read the procedures above, am aware of the location of this safety book, and have either completed or am currently signed up for the UW safety course(s) required to work in a laboratory and possess laboratory keys.
