

Replication files for Eicher, García-Peñalosa and Kuenzel (2018): “Constitutional Rules as Determinants of Social Infrastructure”

To replicate the results in Table 2, execute the Stata file UNBUNDLING_DATA.do, which processes the CCP constitution data and produces the required datasets for the iterative BMA runs. See the appendix in the paper for details. In the second step, execute the R file Table2.R to obtain the BMA results in Table 2.

To replicate the Table 3 results, execute the Stata files Table3a.do and Table3b.do.
