

“Lightning” Term Project Presentations

Version 0.1

Due Date: TBA: Wednesday May 30 or Wednesday June 6th, 2018 @ 4:15 pm (by class vote)

Objective

For the final term project presentation, please prepare a 5 to 7 minute in-class “lightning” presentation. Lightning presentations are meant to present the “highlights” of your term project in an abbreviated format. Your presentation *could* consist of the following slides:

- Slide 1. Introduce Topic / Problem / Services Studied
- Slide 2. Your research question(s) – what did you investigate?
- Slide 3. Results (table / graph) for experiments for research question #1
- Slide 4. Results (table / graph) for experiments for research question #2
- Slide 5. Conclusions

It is not recommended to have more than 5 slides.

Presentations should last approximately 5 to 7 minutes. Approximately 2 to 3 minutes will be allowed for questions. **After 8 minutes the group must stop their presentation and yield to the next group.**

Please submit slides in Power Point or PDF format on Canvas by noon on the day of the presentation. To facilitate quick transitions, we will try to use the same laptop computer.

Presentations will go in order from start to finish:
