BIOGRAPHY

Jacob O. Wobbrock is a Professor of human-computer interaction (HCI) in The Information School (ranked #2), and, by courtesy, in the Paul G. Allen School of Computer Science & Engineering (ranked #6) at the University of Washington, which U.S. News ranked #10 overall in the world, just after Princeton and just before Yale. Prof. Wobbrock's work seeks to scientifically understand people's experiences of computers and information, and to improve those experiences through design and engineering, especially for people with disabilities. His specific research topics include input & interaction techniques, human performance measurement & modeling, HCI research & design methods, mobile computing, and accessible computing. Prof. Wobbrock has co-authored ~160 peer-reviewed publications and received 24 paper awards, including 7 best papers and 8 honorable mentions from ACM CHI, the flagship conference in HCI. For his work on accessible computing, he received the 2017 SIGCHI Social Impact Award and the 2019 SIGACCESS ASSETS Paper Impact Award. He was named the Most Influential Scholar in HCI by AMiner for 2018. He was also inducted into the prestigious CHI Academy in 2019. His work has been covered in The New York Times, The Washington Post, The Huffington Post, USA Today, and other outlets. He is the recipient of an NSF CAREER award and 7 other National Science Foundation grants. He serves on the editorial board of *ACM Transactions on Computer-Human Interaction*. His advisees have been hired at Harvard, Cornell, Colorado, Washington, Brown, Simon Fraser, and elsewhere. Prof. Wobbrock is also an entrepreneur—he was the VC-backed co-founder and C.E.O. of AnswerDash for nearly three years. Prof. Wobbrock received his B.S. with Honors in Symbolic Systems and his M.S. in Computer Science from Stanford University in 1998 and 2000, respectively. He received his Ph.D. in Human-Computer Interaction from Carnegie Mellon University in 2006. Upon graduation, he was honored with CMU's School of Computer Science Distinguished Dissertation Award.

² Unlike in most academic fields, premiere conferences in Human-Computer Interaction (e.g., CHI, UIST) are highly selective venues intended for archival papers only. These conferences exceed many HCI journals in their selectivity, visibility, and impact.
