Economics 475

Economics of the European Union

Titles of Papers

Note: Some of these papers got very high grades and some did not. Papers that are either too general (e.g. Overview of the EMS) or of marginal interest to the EC (e.g. relation with a non-EC country with which the EC has little interaction) or focussing mainly on a field other than economics (e.g. economic geography, political sciences) do not get the best grades.

The EC and CAP
European Monetary Union: Theory and Practice
European Community 1992 Capital Flows: Revised Expectations
External Barriers: a Brief Overview of the EC and GATT
Britain and the EMS
United States of Europe: Britain's Dilemma
