Description of archive contents

Address questions about this archive to Tony Greenwald: agg@u.washington.edu

This archive is supplementary material for an article to appear in 2009 in *Journal of Personality and Social Psychology*.

Greenwald, A. G., Poehlman, T. A., Uhlmann, E., & Banaji, M. R. (2009, in press). Understanding and using the Implicit Association Test: III. Meta-analysis of predictive validity. *Journal of Personality and Social Psychology*.

The archive is intended to facilitate work of two types:
- conducting any desired followup analysis using the meta-analysis data set
- facilitating the conduct of a subsequent meta-analysis of the same terrain

Compressed as a .zip folder, the archive occupies 95.2 MB

The archive has four folders. Folder names are in **bold underline**.

Analyses started Jul08 (16.7 MB)
    All analyses conducted on the final data set used in the article. This should be the starting point for any attempts to re-analyze the data. There is a table of contents in the file named "UUIAT3.Data analysis file organization.30Dec 08.doc". This gives information that should suffice to reproduce all results reported in the article.

Final version.30Dec08 (425 KB)
    Final manuscript file as submitted to JPSP before copy-editing (31 Dec 08).

Report archive (99.6 MB)
    All 122 reports in the form of pdf files, including all correspondence with authors that served to obtain effect sizes that were not in the original report (but were included in the meta-analysis)

Since Feb 07 (8.5 MB)
    Folders with close to 30 reports that would have qualified for inclusion in the meta-analysis, but were not available before the cutoff date of Feb 1, 2007. These should be useful for anyone considering a later meta-analysis covering the same area.
