Christopher Adolph is Associate Professor of Political Science and Adjunct Associate Professor of Statistics at the University of Washington, Seattle, where he is also a core faculty member of the Center for Statistics and the Social Sciences. He holds a Ph.D. in political science from Harvard University, was a Robert Wood Johnson Scholar in Health Policy Research at the University of Michigan, and won the American Political Science Association’s Mancur Olson Award for best dissertation in political economy. He is a perennial instructor in the Essex Summer School in Social Science Data Analysis. His book, Bankers, Bureaucrats, and Central Bank Politics: The Myth of Neutrality (Cambridge University Press), won the International Political Science Association’s Charles H. Levine Prize for best contribution in comparative public policy and administration. His interests cover a broad range of topics in comparative political economy, comparative public policy, public health, and quantitative methods. His research has appeared in American Political Science Review, Political Analysis, Social Science & Medicine, World Development, and other academic journals. He lives in Seattle with his wife, the artist and illustrator Erika Steiskal.
