

Turning in Assignments

Each of the weekly programming assignments ask you to write several short programs in NetLogo. For each program that I ask you to write, please create a **separate** NetLogo file. For example, if Exercises 1.1 through 1.3 on Week 1's assignment each ask you to write a program called **setup**, you should submit three NetLogo files that contain a program called **setup**. Name those files "xy(firstinitial-lastname)", where "x" is the exercise number and "y" is the appropriate part of the exercise. For example, if

Place all of the NetLogo files in a single folder and compress them into a .zip or .tar file. Call the resulting folder "x(firstinitial-lastname)", where "x" is the Assignment number. Then email your assignment to conormw@gmail.com. The subject of your email should be "MS: Assignment x", where "x" is the assignment number. When I receive your email, I will confirm having received your assignment.
