

## ERIC T. SHEA-BROWN

325 Lewis Hall, Department of Applied Mathematics, University of Washington, Seattle WA 98195  
etsb@uw.edu • faculty.washington.edu/etsb

### EDUCATION:

**PRINCETON UNIVERSITY**, Princeton, NJ, 1999 – 2004

Ph.D. (2004), M.S. (2001), Applied and Computational Mathematics

**Advisor:** Philip Holmes

**Co-Advisor:** Jonathan Cohen

**Dissertation:** *Neural oscillators and integrators in the dynamics of decision tasks*

**UNIVERSITY OF CALIFORNIA AT BERKELEY**, Berkeley, CA, 1994 – 1998

B.S. (1998), Engineering Physics (with High Honors)

### ACADEMIC AND SCIENTIFIC POSITIONS:

**Professor, Department of Applied Mathematics, University of Washington**, Seattle, WA

(Associate professor Sept. 2012-Sept. 2016; Assistant professor, Jan. 2008-Sept. 2012)

Research and teaching in theoretical and computational neuroscience, and applied dynamical systems.

**Co-director:** UW Computational Neuroscience Center

**Affiliate Investigator:** Allen Institute for Brain Science

**Adjunct faculty:** Department of Physiology and Biophysics

**Affiliated faculty:** Program in Neurobiology and Behavior, Bloedel Hearing Research Center

**Visiting faculty:** Group for Neural Theory, École normale supérieure, Paris (sabbatical, Winter 2014); Allen Institute for Brain Science, Seattle (sabbatical, Spring-Fall 2014).

**Postdoctoral research fellow, Courant Institute for Mathematical Sciences and Center for Neural Science, New York University**, New York, NY, Sept. 2004-Dec. 2007

Mentor: John Rinzel.

Research in applied dynamics and mathematical neuroscience (neural mechanisms for the representation of time intervals, dynamics of structured oscillator networks, models of correlated spiking in neural populations).

**Research associate, Program in Applied and Computational Mathematics, Princeton University**, Princeton, NJ, Summer 2004

Research in applied dynamics and mathematical neuroscience (dynamics and neural mechanisms of optimal decision algorithms).

**Research fellow, Lawrence Livermore National Laboratory (LLNL)**, Livermore, CA, 1996 – 1999

Associated Western Universities and Dept. of Energy (SERS) programs

Research in computational modeling of chemical transport through geologic domains.

### HONORS AND AWARDS:

**Boeing Endowed Professor of Applied Mathematics** (2015-2018)

**Recipient**, Simons Fellowship in Mathematics (2014)

**Recipient**, National Science Foundation CAREER Award (2011-2016)

**Co-recipient**, 2011 D.G. Marquis Award for best paper of the year in *Behavioral Neuroscience* (Matell et al, 2011)

**Recipient**, Burroughs Wellcome Career Award at the Scientific Interface (2006-2013)

**Recipient** of the 2004 Council of Graduate Schools / University Microfilms International Distinguished Dissertation Award in the field of Mathematics, Science, and Engineering (awarded Nov. 2004)

**Mathematical Sciences Postdoctoral Fellow**, National Science Foundation (2004-2007)

**Porter Ogden Jacobus Fellow**, Princeton University (2003 – 2004)

**Fellow**, Burroughs Wellcome Graduate Training Program in Biological Dynamics (2001 – 2004)

**Fellow**, National Science Foundation Graduate Fellowship Program (1999 – 2002)

**Recipient**, 1999 UC-Berkeley Departmental Citation in Engineering Science

**Recipient**, DOE (SERS), Associated Western Universities Fellowships, LLNL (1996-1998)

**Member**, Phi Beta Kappa, Tau Beta Pi Societies (1998 - present)

### **PUBLICATIONS:**

### **SELECTED RESEARCH GRANTS AND FUNDING:**

- NSF DMS Grant #1514743. *Collaborative research: The ever-changing network – How changes in architecture shape neural computations.* 7/15-6/19 (PI, component to my group, \$90K).
- Simons Fellowship in Mathematics. *Statistics and dynamics of neural population codes.* 6/14-12/14 (PI; \$74K).
- NSF CRCNS Grant #DMS-1208027. *CRCNS: Collective coding in retinal circuits.* 9/12-9/17 (PI; Fred Rieke co-PI, \$500K).
- NSF DMS Grant #1122106. *Collaborative research: Relating architecture and temporal correlations in networks of spiking neurons.* 10/11-9/16 (PI, component to my group, \$130K).
- NSF CAREER Award DMS-1056125. *Bridging dynamical and statistical models of neural circuits -- a mechanistic approach to multi-spike synchrony.* 3/11-3/17 (PI, \$469K).
- NSF DMS Grant #0818153. *Collaborative research: Correlations in neural dynamics and coding.* 8/08-7/11 (PI, component to my group, \$143K).
- Burroughs Welcome Career Award at the Scientific Interface. *Neurobiological Dynamics of Timing and Decisions.* 8/08-7/11 (PI, \$500K). 01/06-12/12.
- Northwest Center for Neural Engineering Seed Grant. *Do robust feedback circuits underlie neural dynamics in decision tasks?* (PI, \$13K). 5/09-4/10.
- NSF Teragrid Scientific Computing allocation TG-IBN090004 (startup category, 410,000 hours of processor time awarded). 10/2009 – 12/2011.

### **TRAINING AND CENTER GRANTS:**

- PI, with A. Fairhall: NIH T90/R90 Training Program in Neural Computation and Engineering at the University of Washington: 5T90DA032436-07 / 5R90DA033461-07, 2016-2021 (~\$1M).
- Thrust leader (current) or co-leader in computational neuroscience, NSF ERC for Sensorimotor Neural Engineering, 2014-2021 (Total ERC Grant ~\$30M).
- Member of faculty leadership team for NIH T90/R90 Grant *Computing and the brain: training the next generation of neuroscientists* (A. Fairhall, PI), 2011-2016.

### **FURTHER RESEARCH GRANTS (AS CO-INVESTIGATOR):**

- NIH R01DC012142 (**Julie Berier, PI**), *Perceptual implications of cochlear implant electrode-neuron interfaces*, 04/2012 - 04/2017.

### **RESEARCH ADVISING:**

#### **Postdoctoral fellows:**

Merav Stern, University of Washington, Applied Mathematics and Allen Institute for Brain Science (*co-advised with Shawn Olsen*, 2016-current; cortical dynamics of learning in visual tasks)

Gabrielle Gutierrez, University of Washington, Applied Mathematics and Physiology and Biophysics (*co-advised with Fred Rieke*, 2016-current; interplay of network interactions and intrinsic dynamics for retinal coding)

Hannah Choi, University of Washington, Applied Mathematics and Biological Structure (*co-advised with Wyeth Bair*, current; dynamics and predictive coding in higher visual circuits)

Braden Brinkman, University of Washington, Applied Mathematics and Physiology and Biophysics (*co-advised with Fred Rieke*, 2013-2017; optimal coding in nonlinear circuits, rescaling and renormalization approaches)

Joel Zylberberg, University of Washington, Applied Mathematics (2012-2015; currently Assist. Prof. of Physiology and Biophysics, U. Colorado; cooperative coding and higher-order correlations in neural circuits)

Andrea Barreiro, University of Washington, Applied Mathematics (2008-2011, currently Assist. Prof. of Mathematics, SMU; mathematical analysis of neural integrators and correlated spiking dynamics)

*External advisor for:* Michael Schwemmer (*co-advised with Adrienne Fairhall; based at MBI*), Mathematical Biosciences Institute (MBI), (current; long timescale computations in recurrent networks)

#### **Ph.D. students:**

Joshua Goldwyn, University of Washington, Applied Mathematics (Ph.D. 2011, Currently Asst. Prof. of Mathematics, Swarthmore University, via postdoctoral fellow at Ctr. for Neural Sci. and Courant Institute, NYU; computational models of signal encoding in auditory neuroscience. Funding award received as advisee: NIH NRSA F-31 Fellowship).

Nicolas Cain, University of Washington, Applied Mathematics (Ph.D. 2012, currently Scientist at Allen Institute for Brain Science; dynamics and signal processing in neural integrator networks; applications to cognitive neuroscience)

Guillaume Lajoie, University of Washington, Applied Mathematics (Ph.D. 2013, Currently Asst. Prof. of Mathematics, University of Montreal, via UWIN Innovation Fellow and Bernstein Fellowship in Computational Neuroscience; synchrony and rhythms in forced neural networks; Funding award as advisee: NSERC Graduate Fellowship).

Yu Hu, University of Washington, Applied Mathematics (PhD 2014, **2014 Top-ranked dissertation at UW in Mathematics, Physical Sciences and Engineering**, “Collective Activity in Neural Networks: the Mathematical Structure of Connection Graphs and Population Codes.” Fellow at Harvard Ctr. For Brain Research; currently Assistant Professor, Hong Kong University of Science and Technology (HKUST); correlations and coding in recurrent neural networks)

Natasha (Alex) Cayco Gajic, University of Washington, Applied Mathematics (PhD 2015; dynamics and statistical mechanics in neural networks; Funding award as advisee: NSF Graduate Fellowship; Currently Postdoctoral Fellow at University College London).

Tim Oleskiw, (current, *co-advised with Wyeth Bair and Anitha Pasupathy, UW Biological Structure*, University of Washington, Applied Mathematics (current; dynamics and coding of higher-order visual features)

Kameron Harris, University of Washington, Applied Mathematics (current; synchrony and topology in rhythm-generating networks; inference of network connectivity from sparse observations)

Alison Weber, (*co-advised with Fred Rieke*), University of Washington, Neuroscience (current; nonlinear signal processing in early visual networks)

Doris Voina, (*co-advised with Stefan Mihalas*), University of Washington, Applied Mathematics (current; POMDP models for staged decision making)

Alexander Hornof, University of Washington, Applied Mathematics (current; theory of structure-driven driven activity in neural circuits)

Iris Shi, University of Washington, Applied Mathematics (current; relating activity in convolutional neural networks and neural recordings)

Matthew Farrell, University of Washington, Applied Mathematics (current; dynamics and chaos in heterogeneous network networks)

Roman Levin, University of Washington, Applied Mathematics (current; co-advised with Sasha Aravkin, UW Applied Math; optimization methods for data-driven spatiotemporal dynamics)

#### **Masters Students:**

Michael Wojnowicz, University of Washington, Mathematics (2012, Masters Thesis: *The Ornstein-Uhlenbeck Process In Neural Decision-Making: Mathematical Foundations And Simulations Suggesting the Adaptiveness of Robustly Integrating Stochastic Neural Evidence*).

David Leen, University of Washington, Applied Mathematics (2013; higher-order activity correlations in neural circuits)

### **Undergraduate students:**

Joshua Mendoza, University of Washington, Applied Mathematics (2014-2015, and 2016-); dynamics of respiratory rhythm generation; Senior Honors Thesis: *The effects of network structure in creating a two-phase breathing pattern in the Botzinger and pre-Botzinger complexes*. Project-specific support received by Mendoza as advisee: UWIN Postbac Fellowship.

Tyler Kekona, University of Washington, (2016); statistical models of neural circuits and effects of hidden units.

Dirir Abdullahi, University of Washington, Neuroscience (Summer 2014; synchrony in sparse inhibitory networks of Boolean neurons)

Yoni Browning, University of Washington, Neurobiology (2012-2013; learning optimal connections in feedforward networks).

Kendrick Tang, University of Washington, Mathematics (2012; correlations in recurrent neural networks).

Megan Lacy, University of Washington, Neurobiology (2012-2013; computational models of network dynamics in Parkinson's disease). Project-specific support received by Lacy as advisee: UW Mary Gates Undergraduate Research Fellowship.

Evan Thilo, University of Washington, Neurobiology (2008-2009; Senior Thesis (Spring '09): *Correlation transfer in conductance-based neuron models*). Project-specific support received by Thilo as advisee: UW Mary Gates Undergraduate Research Fellowship.

Travis Johnson, University of Washington, Applied and Computational Mathematical Sciences (2009; correlation transfer in reduced neuron models – role of saddle-node and Hopf bifurcations)

Brian Greenwald, Princeton University, Chemistry (role: graduate student mentor; Senior Thesis: *Explorations in the Control, Optimization, and Analysis of Neural Systems*, 2004)

### **Additional rotation students (Ph.D.):**

Gabrielle Obrien, University of Washington, Neurobiology and Behavior (2013; models of cochlear implant perception)

Shin Kira, University of Washington, Neurobiology and Behavior (2009; dynamic models of evidence accumulation in simple neural circuits)

Yanping Huang, University of Washington, Physiology and Biophysics (2008; variational methods for identifying level sets of equivalent neural network models)

Riju Srimal, New York University, Center for Neural Science (2007; mentor for Srimal rotation in working group of Prof. John Rinzel; phase plane methods and applications to firing rate models for cognitive tasks)

### **High school students:**

Katherine Leon (2005; co-mentor, Bronx Science High School, project *Biological Networks*, 2005)

### **Selected additional committee memberships (Ph.D.):**

**Applied Math:** Woo Kim (*reader*); Ying Zhou; Peizhe Shi (*reader*); Minsun Kim (*reader*); Dean Gull (*reader*); Edwin Ding (*reader*); Lisa Bishop (*reader*); Christine Lind (*reader*); Pedro Maia; Jacob Grosek (*reader*), Syuzanna Sargsyan (*reader*), Felix Ye, Bethany Lusch (*reader*), Sam Rudy, Lowell Thompson

**Biostatistics:** Shizhe Chen

**Physiology and Biophysics:** Barry Wark, John Cafaro (*reader*)

**Physics:** Mike Famulare (*reader*)

**Computer Science:** Yanping Huang

**Bioengineering:** Nikita Imenov (*reader*)

**Neuroscience:** Shin Kira, Heather Barnett, Maxwell Turner, Dina Popovkina, Gabrielle O'Brien, Jonathan Browning, Dean Pospisil

**Statistics:** Jane M. Lange

**External:** David Lyttle and Patrick Greene (Applied Math, Arizona: *reader*), Philip Eckhoff (Applied Math, Princeton: *reader*), Geoffroy Hermann (Ecole Polytechnique; *reader*), Samuel Feng (Applied Math, Princeton: *reader*)

## **TEACHING:**

### **COURSES**

**Instructor and designer of new course** (with Adrienne Fairhall), University of Washington, Neurobiology and Behavior (NBIO 303), *Neuronal coding and computation* (Winter 2012, 2013, 2015); retitled AMATH 342 (Winter 2016, 2017)

**Instructor and designer of new course**, University of Washington, Applied Mathematics (AMATH 410/510-422/522), *Introduction to Computational Biology and Chemistry* (renamed *Computational Models in Biology*). (Winter 2008, Spring 2008, Winter 2009, 2010, 2011, 2013, 2015, Autumn 2015, 2016)

**Instructor**, University of Washington, Applied Mathematics (AMATH 301), *Beginning Scientific Computing* (Winter 2009), (AMATH 402/502) *Introduction to Nonlinear Dynamics and Chaos* (Winter 2010, 2011, 2012)

**Instructor**, AMATH 500, Journal Club in Theoretical Neuroscience (2012-2015)

**Instructor**, University of Washington, Applied Mathematics. Small-group or individual reading courses on (1) basic computational neuroscience (2) survey of the modern mathematical neuroscience literature (3) stochastic methods in neuroscience (4) Dynamical systems in neuroscience (Winter 2009, Fall 2009, Spring 2010, Summer 2011)

**Guest Lecturer**, Graduate courses on mathematical neuroscience. (U. Washington, 2008-2011, New York University, 2005-2007)

**Teaching Assistant / Unit Lecturer:** Princeton University, APC/MOL/EEB 514 *Biological Dynamics*. Delivered course lectures on population models and synchrony in neuroscience, developed some course materials. (half semester, Fall 2003).

**Teaching Assistant:** Princeton University, MOL437 *Computing Networks and Computational Neurobiology* (Fall 2000); University of California at Berkeley, E24 freshman seminar *Exploring Curvature* (elementary ideas from geometry of surfaces). (Spring 1998).

### **ADDITIONAL TEACHING, TUTORIALS AND SUMMER SCHOOLS**

**Summer BRIDGE Research Mentor:** Intensive tutorial and research exposure for incoming UW first-years (especially underrepresented minorities). Topic: Learning and signal integration in neural network models (UW, 2 weeks, 2011, 2012; 1 week, 2014).

**Summer school faculty:** Methods in Computational Neuroscience (Wood's Hole MBL, 2011, 2012, 2013), Allen Institute / UW Summer Workshop on the Dynamic Brain (2014, 2015, 2016), Berkeley Summer Course in Mining and Modeling of Neuroscience Data (2015)

**Selected tutorials given:** Physiome Project Summer School (U. Washington, 2009-10), Mathematical Neuroscience (Edinburgh, 2011), SIAM Life Sciences Meeting (2010).

### **PROFESSIONAL SERVICE AND LEADERSHIP:**

#### **Positions and Leadership**

Co-director, University of Washington Computational Neuroscience Center (2017-)

Co-director, NIH Training Program in Computational Neuroscience, University of Washington (2016-)

Co-director, Swartz Center for Theoretical Neuroscience at the University of Washington (2015-)

Co-director, Graduate Certificate Program in Neural Computation and Engineering (2016-)

Lead / Co-lead, Thrust in Computational Neuroscience, Center for Sensorimotor Neural Engineering (2015-)

Member of Executive Committee, Neuroscience Graduate Program (2015-)

Member of Executive Committee, University of Washington Institute for Neuroengineering (2014-)

Section Chief Editor for Tutorials and Teaching Material, SIAM DSWeb Dynamical Systems Web Portal (2010-2013)

Member of the Advisory Board, SIAM Activity Group on Dynamical Systems (2010-2012)

Institute Partnership Representative for University of Washington -- NSF Mathematical Biosciences Institute (2008-2014)

Member, Princeton University Graduate School Leadership Council (2006-2008)

### **Other committees**

Service on executive, computing, budget, qualifying exam, merit, and diversity committees, Department of Applied Mathematics, University of Washington

### **Conferences**

General Chair, COSYNE 2018; Co-Chair of Program Committee, COSYNE 2017; Member of Program Committee COSYNE 2010, 2015

Local Co-organizer, CNS\*18, Seattle (upcoming; 2018)

Co-organizer, Collaborative Research in Computational Neuroscience Conference (International CRCNS meeting), Seattle (2015)

Co-organizer, Banff International Research Station (BIRS) Workshop “Connecting Network Architecture and Network Computation” (with 5 co-organizers; 2015)

Co-organizer, Theme Year on Mathematical Neuroscience and Workshops on Mathematical Challenges in Neural Networks and Cognitive Neuroscience, NSF Mathematical Biosciences Institute (2012-2013)

Co-organizer, Conference on Neural Dynamics and Computation in honor of John Rinzel, NYU (June 2009)

Co-organizer, UW and Northwest Computational Neuroscience Connections (2009 -2014; proposals for funding granted by NSF Mathematical Biosciences Institute and UW CSNE)

Co-organizer, Banff International Research Station (BIRS) Workshop “Linking neural dynamics and coding: correlations, synchrony, and information” (with 5 co-organizers; Oct. 2010)

### **Conference sessions**

Session organizer, ICIAM 2011 Congress on Applied Mathematics

Session co-organizer, SIAM 2010 Conference on Life Sciences

Session co-organizer, SIAM 2009 Conference on Applications of Dynamical Systems

Session organizer, SIAM 2008 Annual Meeting (Dynamical systems track; invited)

### **Seminars**

Co-organizer, Computational Neuroscience Colloquium, University of Washington (2009-present)

Co-organizer, Theoretical Neuroscience Journal Club, University of Washington (2008-present)

Organizer, Burroughs Wellcome Fellows Seminars in Biological Dynamics, Princeton University (2001-2004)

Organizer, Applied Mathematics Graduate Student Seminars, Princeton University (2000-2002)

### **Proposal, journal, and book reviewing or editing**

Panelist, NSF, (2011-2013, 2017, 2018)

Reviewer, Washington Research Foundation and Mary Gates Fellowships (2010-12, 2016)

Member, Royalty Research Fund Review Committee, University of Washington (2008-2009)

Grant referee, Marsden Foundation (2008)

Editorial Board member, Oxford Reference Encyclopedia, Neuroscience (2018-)

Reviewer, Washington Research Foundation and Mary Gates Fellowships (2010-12, 2016)

Book review of “Modeling Differential Equations in Biology,” *SIAM Review* 50(4): 807 (2008)

Referee for *Nonlinearity*, *Journal of Computational Neuroscience*, *Journal of Nonlinear Science*, *Cerebral Cortex*, *Physica D*, *Network: Computation in Neural Systems*, *Neural Computation*, *Mathematical Biosciences and Engineering*, *Communications in Math. Science*, *SIAM J. Appl. Dynamical Systems*, *Biophysical Journal*, *Physical Review Letters*, *PLOS Computational Biology*, *Biological Cybernetics*, *Frontiers in Computational Neuroscience*, *Frontiers in Decision Neuroscience*, *Journal of Neural Engineering*, *Journal of Neuroscience*, *Journal of Neurophysiology*, *PLOS Biology*, *Nature Neuroscience*, *Journal of Mathematical Neuroscience*, *Elife*, *Nature* (2003-present)

### **Further outreach**

Lectures on mathematics and brain science at: University of Washington Louis Stokes Alliance for Minority Participation Summer STEM Institute (2010,13), UW Research Exposed course, UW ACMS Undergraduate Seminar series (2012), and several undergraduate research organizations at University of Washington and Rutgers Universities.

### **ADDITIONAL TEACHING AND LEADERSHIP EXPERIENCE:**

**Instructor**, North Carolina Outward Bound School. Taught science, writing, and outdoor leadership for accredited high school Summer Scholars Program (Summer 1998) and outdoor leadership and rock climbing for general courses. (Summers 1996, 1997)

**Expedition assistant**, Patagonian Bros. Expeditions, Argentinean Andes (Cerro Aconcagua, 22,800 ft.; Winter 1996)

### **PROFESSIONAL AFFILIATIONS**

Member of Society for Industrial and Applied Mathematics (2000-present)

Member of Society for Neuroscience (2004-present)

Member of American Physiological Society (2011-2014)

## SELECTED TALKS

**Bernstein Conference on Computational Neuroscience**, Berlin (Plenary). *When do high-dimensional networks produce low-dimensional activity?* (Sept. 2018)

**MIT Brains, Minds, and Machines Seminar** *Linking the statistics of network activity and network connectivity.* (Sept. 2018)

**Swartz Center Seminar**, NYU. *Trying to link the statistics of network activity and network connectivity.* (March 2018)

**Gatsby Center Seminar**, London. *Assembling Collective activity in Neural Circuits.* (June 2016)

**International Congress on Mathematical Neuroscience**, Juan-les-Pins, France. *Assembling Collective activity in Neural Circuits.* (June 2016)

**Joint Mathematics Meetings**, Seattle, WA. *Assembling Collective activity in Neural Circuits.* (Jan 2016)

**Workshop on Topics in Applied Dynamical Systems: Equivariance and Beyond**, OSU, OH. *Assembling Collective activity in Neural Circuits.* (May 2015)

**SIAM Conference on Applications of Dynamical Systems**, Snowbird, UT. *Assembling Collective activity in Neural Circuits.* (May 2015)

**Allen Institute for Brain Science Seminar.** Allen Institute for Brain Science, Seattle. *Assembling population codes in neural circuits.* (Oct. 2014)

**CRCNS Investigators' Meeting.** Tempe, AZ. *Population coding in the direction selective circuit of the retina.* (Oct. 2014)

**Janelia Conference on Signal Transforms in the Early Visual System.** HHMI Janelia Farms Research Campus. *Population coding in the direction selective circuit of the retina.* (Sept. 2014)

**Sloan-Swartz Meeting for Computational Neuroscience.** Seattle, WA. *Assembling collective activity in neural circuits.* (Jul. 2014)

**Neurotheory Seminar**, HHMI Janelia Farms Research Campus. *Assembling collective activity in neural circuits.* (May 2014)

**Applied Mathematics Seminar**, Centre de Recerca Matemàtica, Barcelona. *Neural Integrators: What's optimal and what can we get away with?* (Feb. 2014)

**Neuroscience Seminar**, École normale supérieure, Paris. *Collective spiking and population codes.* (March 2013)

**Center for Neuroengineering Annual Symposium**, Houston, TX. *Collective spiking and population codes.* (Oct. 2013)

**Workshop on Modeling Neural Activity**, Lihue, HI. *Cooperative dynamics in simple neural circuits.* (June 2013)

**SIAM Conference on Applications of Dynamical Systems**, Snowbird, UT. *Spike-based coding in chaotic neural networks.* (May 2013)

**University of Chicago Scientific and Statistical Computing and Neuroscience Seminars.** *Cooperative dynamics in simple neural circuits.* (Feb., April 2013)

**MBI Workshops on Mathematical Neuroscience**, Columbus, OH. *Reliable and unreliable spiking in random neural networks and Neural Integrators: What's optimal and what can we get away with?* (Oct., Dec. 2012)

**International Conference on Theory and Applications in Dynamical Systems**, Seattle. *Reliable and unreliable spiking in random neural networks.* (Aug. 2012)

**Symposium on Neural Coding and Dynamics**, UT San Antonio. *Cooperative dynamics in neural circuits.* (March 2012)

**Applied Mathematics Seminar, Columbia University**, New York. *Cooperative dynamics in neural circuits*. (Jan. 2012)

**Workshop on Mean-field methods and multiscale analysis of neuronal populations, CIRM**, Marseille France. *A mechanistic approach to multi-spike patterns in neural circuits*. (Oct. 2011)

**International Congress on Applied and Industrial Mathematics**, Vancouver. *Cooperative dynamics in simple neural circuits*. (July 2011)

**SIAM Conference on Applications of Dynamical Systems, Snowbird, UT**. *Shared inputs, entrainment, and desynchrony in bursting neurons: From slow passage to circle maps*. (May 2011)

**Neuroscience Seminar, UC Davis**. *Multi-spike patterns in neural circuits: how much complexity should we expect to find?* (May 2011)

**Mathematical Biology Seminar, UC Davis**. *Driven Elliptic Bursters – Entrainment, Desynchrony, and Optimization*. (May 2011)

**Mathematical Neuroscience 2011**, International Center for Mathematical Sciences, Edinburgh. *Cooperative dynamics in simple neural circuits*. (Apr. 2011)

**Applied Mathematics Colloquium**, University of Colorado at Boulder. *Cooperative dynamics in simple neural circuits*. (Dec. 2010)

**Theoretical Neuroscience Colloquium**, University of Waterloo. *Cooperative dynamics in simple neural circuits*. (Nov. 2010)

**Applied Mathematics Colloquium**, University of Arizona. *Cooperative dynamics in simple neural circuits*. (Oct. 2010)

**Gulf Coast Consortium Annual Computational Neuroscience Meeting**, Houston, Texas. *Can common input desynchronize networks during Deep Brain Stimulation?* (Oct. 2009)

**Lorentz Center Workshop on Brain Waves**, Leiden, Netherlands. *Simulating DBS in layered networks: optimization and entrainment*. (June 2009)

**Frontiers in Applied and Computational Mathematics**, Newark, NJ. *Neural coding and dynamics under cochlear implant stimulation*. (June 2009)

**SIAM Conference on Applications of Dynamical Systems, Snowbird, UT**. *What limits cooperative spiking in feedforward networks?* (May 2009)

**Center for Control, Dynamical Systems, and Computation Seminar**, UC-Santa Barbara, Santa Barbara, CA. *Dynamics of correlation and coding in simple neural circuits*. (May 2009)

**Applied Mathematics Seminar**, Univ. of Michigan, Ann Arbor, MI. *Dynamics of correlation and coding in simple neural circuits*. (April 2009)

**Neurobiology and Behavior Seminar**, Univ. of Washington, Seattle, WA. *Reliable and unreliable spike times in model networks--a role for feedback?*. (April 2009)

**Bioengineering Seminar**, Univ. of Washington, Seattle, WA. *When does feedback destroy the reliability and precision of neural spike times? Some first steps*. (Feb. 2009)

**Institute for Applied Mathematics Seminar**, University of British Columbia, Vancouver, Canada. *Dynamics of correlation and coding in simple neural circuits*. (October 2008)

**SIAM Conference on the Life Sciences**, Montreal, Canada. *Reliable and unreliable dynamics in driven oscillator networks*. (August 2008)

**5<sup>TH</sup> European Congress of Mathematics**, Amsterdam, Holland. *Reliable and unreliable dynamics in driven oscillator networks*. (July 2008)

**Machine Learning and Biological Computation Seminar**, Univ. of Bristol, Bristol, UK. *Tuned correlation transfer and consequences for coding*. (June 2008)

**Applied Mathematics Seminar**, Univ. of Washington, Seattle, WA. *Touring computational neuroscience*. (April. 2008)

**Mathematics and Statistics Colloquium**, Portland State Univ., Portland, OR. *Dynamics of correlation and coding in simple neural circuits*. (Feb. 2008)

**Physiology and Biophysics Seminar**, Univ. of Washington, Seattle, WA. *Tuned correlation transfer and consequences for coding*. (Feb. 2008)

**Neurobiology Seminar**, Yale Univ., New Haven, CT. *Tuned correlation transfer and consequences for coding*. (Oct. 2007)

**Workshop on Mathematical Neuroscience**, CRM, University of Montreal, Montreal. *Tuned correlation transfer and consequences for coding*. (Sept. 2007)

**Fellows' Seminar, Center for Neural Science**, New York Univ., New York, NY. *Simple models for encoding elapsed time*. (May 2007)

**SIAM Conference on Applications of Dynamical Systems**, Snowbird, UT. *Reliable and unreliable dynamics in coupled theta neurons*. (May 2007)
