

*Figure 12.10* A model of the Nagasaki "Fat Man" bomb alongside the modern Mk-12A warhead used in Minuteman III missiles. "Fat Man" weighed nearly 11,000 pounds and yielded the equivalent of 22 kt of TNT. The Mk-12A weighs less than 800 pounds and yields 335 kt. Each Minuteman carries three Mk-12A warheads. (Los Alamos National Laboratory)
